CALENDAR

1912.

September 4 and 5—Entrance Examinations. (See note below.)

September 4—Opening of XXIX Session.

December—Christmas holiday.

1913.

January 20—Fall Term ends.

January 21—Spring Term begins.

June 4—Close of Session.

NOTE.—The Dormitory will not be open for boarders until Tuesday, September 3. All *new students* are required to come on that day, so as to be in place for the *Entrance Examinations* or classification on the morning of the 4th. All *former students* are also required to come that day, so that the Schedule Committee may wait upon them *before* Friday. All *Seniors* who expect to teach in the training school *must* report to the Director of the Training School *not later* than the 4th.

Dormitory room will not be reserved for students later than the morning of Wednesday, September 4, except in cases of special arrangement.

*ENTRANCE EXAMINATIONS.

Wednesday, September 4—Room N.

9:00—Algebra.

11:00—Grammar and Composition.

2:00—Physical Geography.

Thursday, September 5—Room N.

9:00—Ancient History.

11:00—Latin.

†SCHEDULE APPOINTMENTS.

Wednesday, September 4.

9:30—Room E—Teaching Senior A Class.

9:30—Room D—Second A Academic Class.

10:30—Room E—Academic Senior A's.

11:30—Room E—Junior A's who have come up from lower classes.

2:30—Room E—Elementary Professional Class.

2:30—Room D—Second A Elementary Class.

4:00—Room E—Fourth A Class.

Thursday, September 5.

9:30—Room E—Junior A Class, High School Graduates.

9:30—Room D—First Year Academic Class.

11:00—Room E—Third A Class.

2:30—Room E—All new students who have been classified by examination or certificates, and all irregular students not yet provided for by the Schedule Committee.

2:30—Room D—First Year Elementary Class.

*Examinations will not be given after these dates except for the most urgent reasons.

†A fee of one dollar must be paid by all students who have schedules made after the time appointed for their class.

BOARD OF TRUSTEES

HON. ROBERT TURNBULL, *President.*

REV. JAMES NELSON, D. D., LL. D., *Vice-President*

JUDGE A. D. WATKINS, Farmville, Va., *Secretary and Treasurer.*

HON. J. D. EGGLESTON, Superintendent of Public Instruction (*ex officio*).

Term Expires in 1912

HON. ROBERT TURNBULL.....	Lawrenceville
REV. JAMES NELSON, D. D., LL. D.....	Richmond
J. S. WARE.....	Berryville
HON. C. HARDING WALKER.....	Heathsville
HON. J. J. OWEN.....	Green Bay
SUPT. M. D. HALL.....	Burks

Term Expires in 1914

JUDGE J. M. CRUTE.....	Farmville
O. E. JORDAN.....	Dublin
T. C. WATKINS.....	South Boston
GEORGE T. BRIDGEFORTH.....	Kenbridge
J. B. BOTTS.....	Roanoke
M. P. FARRIER.....	Pearisburg
HON. J. B. WATKINS.....	Midlothian

STANDING COMMITTEES.

Executive Committee—Messrs. Turnbull, Nelson, Walker, Ware, Owen, and Crute.

Committee on Instruction—Messrs. Nelson, Eggleston, Walker, Hall, and Jordan.

Committee on Grounds and Buildings—Messrs. J. B. Watkins, Bridgeforth, Hall, Jordan, and Farrier.

Committee on Finance—Messrs. Ware, Botts, Crute, T. C. Watkins, and J. B. Watkins.

FACULTY

J. L. JARMAN, B. A., LL. D., *President.*

B. A. Emory and Henry College; University of Virginia, 1886-1889; LL. D. Hampden-Sidney College.

CLIFF W. STONE, B. S., PH. D.,

Education and Director of Training School.

B. S. Teachers' College, Columbia University; Ph. D. Columbia University; Full Diploma State Normal, Oshkosh, Wis.

W. ARTHUR MADDOX, A. B., A. M.,

Education and Principal of Training School.

L. I., A. B., College of William and Mary; Master's Diploma in Education, Teachers' College; and A. M., Columbia University, New York City; Superintendent of Public Schools, Henrico County, Va.

J. CHESTER MATTOON,

Manual Training.

Graduate Baltimore Polytechnic Institute, 1890; Graduate Maryland Institute, Schools of Art and Design, 1897; Summer Course Teachers' College, 1907; Instructor Baltimore Polytechnic Institute, 1897-98; Instructor Maryland Institute, 1894 to 1897.

F. A. MILLIDGE, B. A., M. A., PH. D.,

Geography.

B. A. University of New Brunswick, Canada; M. A. University of New Brunswick, Canada; Ph. D. Leipzig University; Student at Normal School, New Brunswick, 1878-79; Summer Course at Cook County Normal School, 1892, 1893; Chautauqua Science Course, 1893; University of Chicago, 1894-95; Summer Course University of Chicago, 1894, 1895; University of New Brunswick, 1896.

J. M. LEAR, A. B., A. M.

History and Social Sciences.

A. B. and A. M., Randolph-Macon College, Ashland, Va.

JAMES M. GRAINGER, B. A., M. A.,

Literature and Reading.

B. A. University of Cincinnati; M. A. University of North Carolina.

THOMAS D. EASON, B. S.,

Biology.

B. S. Clemson College (Agricultural and Mechanical College of South Carolina), 1907; Graduate Student North Carolina College of Agriculture and Mechanical Arts, 1908.

M. BOYD COYNER, B. A., M. A.,

Assistant in Education.

B. A. Concordia College, 1908; M. A. University of Virginia, 1911; Student Columbia University, Summer Session, 1911.

MARTHA W. COULLING,

Drawing and Form.

Diploma Peabody Normal College, 1887; Martha's Vineyard Summer School, 1888; Student under Fred H. Daniels, Summer 1900, and under W. T. Bear, Chautauqua Summer School, 1894; Student in Teachers' College, New York, 1895-96 and 1904-05; Applied Arts Summer School, Chicago, 1909.

MINNIE V. RICE,

Latin.

Graduate Farmville College; Summer Course at Harvard; Summer Course at Columbia, 1911.

ESTELLE SMITHEY,

French and German.

Graduate in Modern Languages, Randolph-Macon College, 1895; Diploma of L'Alliance Française, Paris, 1899; Student at the Sorbonne, Paris, 1904-05.

LULA OCILLEE ANDREWS, L. I.,

English Language.

L. I. Peabody Normal College, Nashville, 1892.

LULIE G. WINSTON, B. S., PH. D.,

Chemistry and Physics.

B. S. Richmond College; Summer Courses in Chemistry and Physics Harvard University, 1903, 1906, 1907; Ph. D. Johns Hopkins University, 1911.

LILA LONDON,

Mathematics.

Graduate High School, Roanoke, Va.; Course in Surveying, Roanoke College, Salem, Va.; Special Student in Mathematics under Dr. Wm. M. Thornton, University of Virginia; Summer Course at Knoxville, Tenn., 1903, and at Cornell University, 1909.

LYDIA OVERALL, B. S.,

Physical Training.

B. S. Clinton College; Graduate of Posse Normal School of Gymnastics, Boston; Summer Course Harvard University, 1907.

ELLEN G. PERKINS,

Sight Singing.

Graduate High School, Columbus, Wis.; Student State Normal School, Oshkosh, Wis.; Summer Course, University of Minnesota; Student Teachers' College, New York, 1905-06; Private Voice Instruction, under Willard E. Patten, Minneapolis, Minn., Frank L. Tubbs, and Mr. and Mrs. J. D. Mehan, New York.

MARY ELIZABETH FALLS, B. S.,

Industrial Phases of Education, and Supervisor of Second Grade.

B. S. Columbia University, 1907; Diploma, Teachers' College, 1906; Graduate Winthrop Normal Training School, South Carolina.

MARY PHILIPPA JONES, B. S.,

Primary Methods and Supervisor of First Grade.

Diploma Teachers' College; B. S. Columbia University; Graduate of State Normal College, Florence, Ala.; Graduate of Cook County Normal School, Chicago.

MEREDITH SMITH,

Kindergarten Education and Supervisor of Kindergarten.

Graduate Teachers' College, Columbia University, 1902; Summer Session, Teachers' College, 1902; Wisconsin University, 1909, 1910.

LEOLA WHEELER, A. B.,

Reading.

A. B. Smith College; Graduate of Emerson College of Oratory; Post-Graduate Work at Emerson College of Oratory, 1911.

FANNIE WYCHE DUNN, L. I.,

Supervisor of Rural Schools.

Graduate High School, Petersburg, Va.; Student for one year at John B. Stetson University, De Land, Fla.; L. I. Peabody Normal College, Nashville, Tenn.

HELEN BLACKISTON,

Assistant in Mathematics and Biology.

Graduate State Female Normal School, Farmville, Va., 1902; Student Cornell Summer School, 1905; Student at Columbia, Session 1910-1911.

ELOISE AMBLER HARRISON, L. I.,

Assistant in Mathematics.

L. I. Peabody College for Teachers, 1903; Student in University of Nashville, 1904; Summer Course Cornell University, 1906 and 1908; Summer Course Columbia, 1911.

CARRIE SUTHERLIN,

Assistant in English.

Graduate State Female Normal School, Farmville, Va., 1904; Summer Course Cornell University, 1909.

MARY CLAY HINER,

Assistant in English.

Graduate State Female Normal School, Farmville, Va., 1904.

HANNAH FENNEL CRAWLEY,

Assistant in History.

Graduate Danville College, Danville, Va.; Student at University of North Carolina, at Cornell University, and under Dr. Clark, at Chautauqua.

VIRGINIA BUGG,

Assistant in History.

ETHEL JARRETT, A. B.,

Assistant in Mathematics.

A. B. Cornell University; Summer Course Columbia University, 1910.

MARY CLOSSON,

Assistant in Manual Training, and Acting Teacher of Household Arts.

Graduate High School, Logansport, Ind.; Graduate Domestic Science Department, Pratt Institute, Brooklyn, N. Y.

VIRGINIA PAULETTE,

Student Assistant in Gymnasium.

TRAINING SCHOOL

CLIFF W. STONE, B. S., PH. D.,

Director.

W. ARTHUR MADDOX, A. B., A. M.

Principal of Training School and Supervisor of Seventh and Eighth Grades.

MARY D. PIERCE, L. I., B. A.,

Supervisor of Fifth and Sixth Grades.

L. I. Peabody Normal College, Nashville, Tenn.; B. A. University of Nashville; Student at University of Chicago.

ELEANOR BRYNBERG FORMAN,

Supervisor of Third and Fourth Grades.

Diploma (Elementary Teaching and Supervision) Teachers' College, New York, 1909; Critic, State Normal Training School, Brockport, N. Y., 1909-1910; Student Chautauqua, N. Y., 1906; Teachers' College, 1907-09.

MARY ELIZABETH FALLS, B. S.,

Supervisor of Second Grade, and of Industrial Work in Primary Grades.

B. S. Columbia University, 1907; Diploma, Teachers' College, 1906; Graduate Winthrop Normal Training School, South Carolina.

MARY PHILIPPA JONES,

Supervisor of First Grade.

B. S. Columbia University; Graduate of State Normal College, Florence, Ala.; Graduate of Cook County Normal School, Chicago.

MEREDITH SMITH,

Supervisor of Kindergarten.

Graduate Teachers' College, Columbia University, 1902; Summer Sessions Teachers' College, Columbia University, 1902; and Wisconsin University, 1909-1910.

MARY PENN THOMPSON,

Assistant Supervisor of Eighth Grade.

L. I. Peabody College for Teachers, Nashville, Tenn.; B. A. University of Nashville; Summer Course at University of Chicago, and at Teachers' College, New York.

MARY E. PECK,

Assistant Supervisor of Seventh Grade.

Graduate State Female Normal School, Farmville, Va., 1903; Summer Course at Chautauqua, N. Y.; Course in Supervision, Teachers' College, New York, 1910.

MAMIE E. ROHR,

Assistant Supervisor of Sixth Grade.

Graduate High School, Lynchburg, Va.; Student for two years at Randolph-Macon Woman's College, Lynchburg, Va.; Special Student at University of Chicago.

MAUD INEZ TILLMAN, L. I.,

Assistant Supervisor of Third Grade.

L. I. Winthrop Normal and Industrial College, Rock Hill, S. C., 1899;
Student of South Carolina State Summer School, 1901, 1902; Student of
Summer School of the South, 1903; Student of University of Virginia
Summer School, 1910.

MARTHA W. COULLING, *Secretary of Faculty.*

JENNIE M. TABB, *Secretary to the President and Registrar.*

ALICE B. DUGGER, *Librarian.*

MAUD K. TALIAFERRO, *Assistant Librarian.*

JUANITA MANNING, *Student-Assistant in Library.*

VIRGINIA PAULETTE, *Student-Assistant in Library.*

*STANDING COMMITTEES.

Committee on Schedule of Recitation—Miss Andrews, Miss Coulling, Miss Hiner, Miss Sutherlin, Miss Jarrett, Miss Harrison, and Miss Bugg.

Committee on Course of Study—Miss Andrews, Miss London, Mr. Grainger, Mr. Maddox, Dr. Millidge, Mr. Lear, Dr. Stone, and Mr. Eason.

Committee on Classification—Miss Rice, Miss Smitley, Miss London, and Mr. Maddox.

Committee on Accredited Schools—Mr. Maddox and Miss London.

Committee on Training School Course of Study—Dr. Stone, Mr. Lear, Mr. Maddox, Miss Forman, and Miss London.

Committee on Entertainments—Miss Coulling, Miss Perkins, Miss Overall, and Miss Wheeler.

Committee on Library—Mr. Grainger, Mr. Lear, and Dr. Stone.

Committee on Editing Catalogue—Miss London, Mr. Lear, and Miss Jarrett.

Committee on Training School Bulletins—Dr. Stone, Miss Forman, Miss Pierce, and Mr. Grainger.

Committee on Annual—Mr. Lear, Miss Coulling, Miss Winston, and Mr. Eason.

Committee on Literary Societies—Mr. Grainger, Mr. Lear, Dr. Millidge and Miss Wheeler.

Committee on School Magazine—Mr. Grainger, Miss Wheeler, Mr. Lear.

Committee on Averaging Grades—Miss Coulling, Miss London.

Committee on Bi-weekly Reports—Miss Jarrett, Miss Rice, Miss Bugg.

*The President is ex-officio member of all committees and chairman of the Committee on Course of Study.

BUSINESS DEPARTMENT.

MR. B. M. COX,
Business Manager.

MISS FLORENCE M. CLAYTON,
Clerk to Business Manager.

HOME DEPARTMENT.

MISS MARY WHITE COX,
Head of the Home.

MRS. MARY PAYNE HARRIS,
Assistant Head of the Home.

MISS SUSIE E. ALLEN,
Assistant in the Home Department.

MISS ANNE N. WALKER,
Student-Assistant in Home Department.

MRS. ANNIE SLATER,
Night Matron.

MRS. BESSIE CAMPER JAMISON,
Housekeeper.

MRS. NANNIE V. BERGER,
Assistant Housekeeper.

MRS. LILLIAN V. NUNN,
Supervisor of Laundry.

*DR. SUSAN WILSON FIELD,

†DR. ANNIE VEECH
Resident Physician.

MRS. ROXIE I. BERRY, R. N.,
Trained Nurse.

MISS ELEANOR RICHARDSON,
Y. W. C. A. General Secretary.

*Resigned Feb. 1, 1912.

†Appointed April 1, 1912.

GENERAL INFORMATION

HISTORY OF THE SCHOOL.

It was not until about thirty years ago that the public mind in Virginia came to connect the stableness of free institutions with the intelligence of the people, and to see that general education is the basis of general thrift. The first Legislature to assemble after the adoption of the *post-bellum* Constitution established (July 11, 1870) a system of public schools. For twelve years or more the conduct of these schools was entrusted to such teaching force as was found ready at hand. In this experimental period nothing was more fully demonstrated than that, if the returns were to be in any wise commensurate with the cost and the high mission of the system, some provision must be made for a reliable source of supply of teachers fitted by education and training for their work. To meet this demand the Legislature, in March, 1884, passed an act establishing the *State Female Normal School*. In October of the same year the work of the school was begun, buildings long in use for school purposes having been procured in the town of Farmville.

One hundred ten students were enrolled the first session. From the outset the school has steadily grown, making necessary, from time to time, the enlargement of its accommodations.

The school is supported by funds from *The State Appropriation*, and by *Tuition-Fees*, paid by Virginia students in excess of the number who receive free tuition, and by students from other States.

During the twenty-eight years of its existence the school has sent out over a thousand graduates, nearly all of whom are, or have been, teachers of the public schools in the State. There have been over two thousand matriculates. Of these, a large number (besides those who have graduated) have carried to the different sections of the State some knowledge of the methods and aims of the school. There is hardly a county or city in the State where one of its graduates may not be found, and no section where its influence has not been felt.

PURPOSE.

The State Female Normal School exists as a technical institution for the training of teachers to carry on the work of popular education in the State of Virginia. The central idea in the school is to inspire young women to enter the profession of teaching with clear and accurate ideas of the various educational problems that confront the public school teacher.

It is no longer deemed adequate that a teacher be proficient in subject matter only; professional training must be added. Hence, even in the academic work of the school, the professional idea is emphasized. Incidental instruction in methods is everywhere given in connection with the presentation of subject matter. Courses in psychology are given to throw light on the laws of mental development, that these may not be violated in the training of youth. Courses in the history of education give the teacher the evolution of the educational ideals of the present day, and bring her face to face with the educators and teachers of all ages, together with their methods and systems. Courses in school management are designed to help the teacher in organizing and conducting a school upon sound pedagogical principles. Actual teaching in our Training School under the guidance and criticism of special supervisors gives to the State a body of teachers specially trained for their profession. Every department in the institution lends its assistance to the department of education in inspiring the young teachers with the loftiest ideals of what the true teacher should be, and what sort of service should be given the State.

Thus, it becomes apparent that the purpose of the institution is to give to the teachers of the State of Virginia the highest professional skill possible in the training of her future citizens.

LOCATION.

Farmville is a healthful and pleasant town of about three thousand inhabitants. It is one of the chief tobacco marts of Virginia, having a large export trade. Hampden-Sidney College is near by, and the social life of the town has the advantages that have come of over a hundred years of wholesome college influence. It has good schools and five churches—Baptist, Episcopal, Methodist, Presbyterian and German

Lutheran. Its location at the junction of the Tidewater and Western Railroad with the Norfolk and Western, about midway between Lynchburg and Petersburg, puts it in communication with all parts of the State.

BUILDINGS.

The plant is a three-story brick structure, containing an auditorium, a reception hall, parlors, students' sitting-room, a library, reading-room, twenty class-rooms, chemical biological, and geographical laboratories, manual training workshop, gymnasium, ten class-rooms for the training school and kindergarten, six offices, and home accommodations for four hundred ten students.

There is steam heat and electric light throughout the building. The dormitories are attractively furnished and are provided with white iron beds.

Near the main building, yet entirely apart from it, is a well-equipped infirmary, in charge of a woman physician and trained nurse, both of whom live in the building and give their entire time to the health of the students.

A WORD TO DIVISION SUPERINTENDENTS.

The Normal School is supported by the State in order that, through the agency of trained teachers, the large annual appropriation for public schools may be made productive of the best results in promoting the intelligence and prosperity of the people.

All parts of the State must contribute alike to the support of the school; they should all share alike in its benefits. The extent to which this is realized depends largely upon Division Superintendents of Education. The coöperation of every Superintendent is earnestly desired in securing for every county its just representation. In no way can you render better service to the young women of your Division, or more reasonably hope to equip your schools with the kind of teachers essential to their highest efficiency, than by urging them to attend this school, taking care at the same time to recommend only such applicants as come up fully to the requirements.

Do not hesitate to call upon the President of the school for any service he can render. If you want a good teacher, write to him; he may be able to supply your wants exactly. (See page 23.)

DISCIPLINE.

In the conduct of a school for young women about to assume the responsibilities of a serious and dignified profession like teaching, there is little occasion for arbitrary, iron-clad discipline. Beyond the expectation that the life of our students shall conform to the requirements of promptness and fidelity to duty, and exhibit that gentle demeanor and considerate regard for others which characterize refined womanhood, we have few fixed rules. This does not mean, however, that the girls are absolutely without restrictions, with the opportunity to turn freedom into license. It is the sole duty of the head of the home and her assistants to keep in close contact with the daily life and conduct of pupils, to know where they are and what they are doing, and to provide suitable chaperonage whenever necessary. When there appears occasion for admonition and reproof, they are faithfully given. If the pupil is found to be falling off in her studies, neglecting duty, or exerting an unwholesome influence, prompt steps are taken for her amendment. A young woman who does not show some disposition to conform to high standards can hardly be considered good material for a teacher; so, if one is found unresponsive to patient endeavors to bring her to the line of duty, her connection with the school is quietly severed by virtue of the following order of the trustees: "If, in the judgment of the President, it shall at any time appear that a student is not making proper use of the advantages which the State offers in the State Female Normal School, or that her influence is in any way prejudicial to the interests of the institution, or of her fellow-students, it shall be his duty to declare her place vacant."

STUDENT GOVERNMENT ASSOCIATION.

The purpose of the association shall be to preserve the student honor and to further the interests of the school as far as lies within its power.

It has jurisdiction over the girls during study period and in the dining-room, and in all cases in which the good name of the student body as a whole would be involved.

Decisions rendered by the Student Government Committee are reviewable by the President.

RELIGIOUS LIFE OF THE SCHOOL.

While a State institution, and hence not under denominational influence, the importance of a life higher than the intellectual is fully realized, and the religious interests of the students are a matter of constant and prayerful concern. School is opened every morning with the reading of the Scriptures, a hymn, and prayer. The ministers of the several denominations of the town take part in conducting these services.

The members of the faculty, at the beginning of each term, obtain lists of students of their respective denominations, and see that each one is invited to the church and Sunday-school which she is in the habit of attending at home. There are several teachers belonging to each of the religious denominations represented in Farmville, and our students are cordially welcomed at whatever church they may attend. Attendance on church services is not compulsory, but its regular observance is urged upon the students as a sacred duty.

The school endeavors to maintain high moral and Christian standards, and to create an atmosphere of earnestness; for it is esteemed to be not the least important mission of the institution to send out young women equipped with a steady purpose to perform well and faithfully the duties that lie before them—a holy purpose to make most of themselves that they may do most for others.

THE YOUNG WOMEN'S CHRISTIAN ASSOCIATION.

The Young Women's Christian Association aims to unite all the students in school in common loyalty to Jesus Christ, building them up in the knowledge of Christ through Bible study and Christian service. It urges upon its members the value of church membership, church loyalty and responsibility for some form of church work. Its interdenominational character widens its interests, broadens its sympathies, and deepens its spirituality.

The association is affiliated with the National Board of Young Women's Christian Associations of the United States, and thus, with the national organizations of twenty other nations, whose entire membership includes 500,000 Christian young women throughout the world.

The activities of the association are entirely in charge of the student members. They hold weekly devotional meetings in the auditorium every Saturday afternoon at two o'clock, besides conducting evening prayers after supper every night, and morning watch, daily, at 7:15 o'clock. The Bible Study Committee urges every student to do some form of daily Bible study and invites her to join a class in the Sunday-school of her own denomination, taught by senior members of the association or by faculty members. Various mission study classes are open to members. The Extension Committee seek to be of service outside of the association itself in many practical ways. One hundred and fifty dollars was raised by systematic giving last year for benevolent causes, two-thirds of which was used for foreign missions.

The members of the association—the "White Ribbon Girls"—show every courtesy to the new student as she adjusts herself to the new and bewildering routine of school life. Handbooks, issued by the association and giving a concise account of student life in the school, are sent to girls about to enter for the first time. If any girl happens to be overlooked, the General Secretary, whose headquarters are in room 82, will be very glad to give them to the new-comers any time. Her office hours are from twelve to one every day, and she would deem it a great favor if every new girl would find her out and make herself known to her sometime during the first week of the term.

Every young woman attending the school is cordially invited to become a member of the Young Women's Christian Association and to help it to realize its purpose through her interest and hearty support.

VIRGINIA NORMAL LEAGUE.

The objects of the league are twofold: First, to found and maintain an aid fund for those students who would otherwise be unable to attend school. Second, to conduct a free educational bureau for our students.

OFFICERS.

Miss M. W. Coulling.....	President
Dr. F. A. Millidge.....	Vice-President
Miss Evelyn Purcell.....	Secretary
Miss Florence Boston.....	Treasurer

EDUCATIONAL BUREAU COMMITTEE.

Dr. J. L. Jarman.....	Chairman
-----------------------	----------

AID FUND COMMITTEE.

Miss Estelle Smithey.....	Chairman
---------------------------	----------

FINANCE COMMITTEE.

Miss M. V. Rice.....	Chairman
----------------------	----------

The Aid Fund is maintained by the annual one dollar fees of members of the League and by voluntary contributions from outside sources. Its aim is to help by loans, without interest, worthy young women who wish to prepare for effective service as teachers. Eight of these have received such aid during the past year, making a total of forty-five beneficiaries of the League since its organization. It offers a good opportunity to all who are willing to extend a helping hand to coming generations as well as this. There is no better place to invest money, with this view, than in the brain of an earnest, honest young woman. The committee will gratefully receive, and faithfully use, any contribution, large or small, that may be sent. The League has now over four thousand dollars, all of which is in use. As soon as any amount is returned it is lent out again at once, *for the demand for aid is greater than can be supplied*. All requests for aid should be made by May 10th.

The EDUCATION BUREAU seeks to serve as a free medium of communication between teachers trained and approved by the school and persons who wish to employ teachers of this sort. It engages to recommend only such as are believed to be thoroughly qualified for the work contemplated, and in all respects trustworthy. County superintendents, school trustees, and others desiring good teachers, will do well to apply to the Bureau. Full information will be furnished *gratis*.

We shall be glad to hear from former students of the school. Tell us where you are, and what you are doing. Please bring the Bureau, as far as you can, to the knowledge of the public, especially those interested in employing teachers, and inform us of vacancies whenever you can. We beg you also to take the lead in organizing auxiliary chapters in your counties. Two have already been organized, one in Bristol and one in Roanoke. Circulars of information as to these will be sent on application. Address, VIRGINIA NORMAL LEAGUE, Farmville, Virginia.

CUNNINGHAM MEMORIAL LOAN FUND.

The Alumnæ of the school who graduated during the administration of Dr. John A. Cunningham, from 1886 to 1896, have raised a fund, intending to establish a scholarship in memory of his faithful and loving service to them and to the State, feeling that the most fitting tribute that could be paid him would be the effort to give to those who are unable to obtain it for themselves the training for the work to which he devoted his life.

When this fund amounted to \$1,000 it was decided that, instead of letting it lie idle until it reached a sufficient sum to endow the scholarship, it should be placed in the hands of the President of the School, to be loaned at five per cent. interest, to worthy students who could not pay their own expenses. Thus, it is bearing fruit even before the scholarship is established, and proving of great assistance to some of our best students.

Those wishing to obtain a loan from this fund should apply to President Jarman.

STATE LOAN FUND.

The State of Virginia provides that a sum equal to one per cent. of the annual appropriation of State institutions be used as a Loan Fund for the benefit of students who are unable to defray their expenses. Not more than \$100.00 per session is loaned to a student. The interest required is four per cent., and all notes must be properly endorsed.

Applications for assistance from the State Loan Fund should be addressed to President Jarman.

LIBRARY AND READING ROOM.

The students are supplied with collateral reading, reference work, and recreative reading from a Library of 6,287 classified volumes and a Reading Room containing encyclopædias, dictionaries, atlases, twelve daily and forty-five weekly and semi-weekly papers of the State, besides one hundred nine well-selected departmental and popular periodicals.

LITERARY AND DEBATING SOCIETIES.

There are four literary societies, the Argus, the Cunningham, the Pierian, and the Athenian, and two debating societies, the Jefferson and the Ruffner. These are an important factor in the intellectual and social life of the school. They impart a strong impulse to literary work and debating, and bring the girls together at regular times for a common intellectual purpose. The literary societies aim primarily to promote a real interest in literature, the debating societies to afford an opportunity for practice in debating to every student above the second year class who will avail herself of the opportunity. All of the societies attempt to develop and exercise individual talent, to arouse and encourage social instincts, and to afford practice in organization and in parliamentary usage.

Meetings are held every week throughout the year and a spirit of friendly rivalry is shown in the effort to offer interesting programs. Each literary society chooses some special period of literature or some writer or group of writers to be studied during the year. This study forms the basis of the literary programs. Debates also are held at regular intervals by the literary societies. The debating societies hold spirited debates regularly each week. These debates develop the powers of argument, clear and logical thinking and forceful expression. In addition to this work all the societies hold special meetings, which add variety. The programs for these meetings are in a lighter vein, and afford opportunity for the exercise and encouragement of musical and histrionic talent.

STUDENT PUBLICATIONS.

The Focus is a monthly magazine published by the students. The editorial staff is composed of the students and two alumnae, who are assisted by reporters from the different classes and school organizations. The magazine aims to promote literary activity among the students. Trophies are awarded to those who contribute the best work.

The Virginian is an annual publication which is edited and published by the student body.

STATE SCHOLARSHIPS.

Any young lady desiring an appointment as State student should apply to the President for application blank. This blank, when filled out and signed by the Division Superintendent, should be returned to the President. If the application is favorably considered, the applicant will be notified of her appointment. Every State student is required to sign a pledge that she will teach in the public schools of Virginia for at least two years after leaving the Normal School. While thus teaching she receives pay for her services as any other teacher.

Upon the expiration of this period she is required to send to the President a statement, signed by a Division Superintendent, to the effect that she has fulfilled this pledge; or make to him a satisfactory explanation of her failure to do so. Otherwise, she will receive a bill for her tuition.

All students applying for State scholarships must be at least fifteen years of age, of good moral character and sound health.

Young women from Virginia, not appointed as State students, and applicants from other states, are admitted as pay students; the charge for tuition being \$30.00 per session.

EXPENSES.

A registration fee, payable in advance, for entire session, \$5.00; for spring term, \$3.00. Public school teachers entering in April are charged no registration fee.

Board, including lights, fuel, towels, bedding, washing, physician's attendance, *everything*—per month, payable in advance, \$15.00.

No account is taken of absence under a month, nor for Christmas holidays.

Checks for board or tuition should not be made payable to the President, but to the student herself.

Tuition for pay students, for the half session, payable in advance, \$15.00.

The total expense per session for a State student, as shown above, is \$140.00; for a pay student, \$170.00.

All moneys due the School should be paid to Mr. B. M. Cox, Business Manager, and receipts taken therefor.

Registration fees should be paid to Mr. Cox as soon as possible after arrival at school, as no student is enrolled in her classes until she can show a receipt for this fee.

No diploma or certificate is granted to anyone until all sums due the school are paid; nor are students at liberty to occupy the rooms previously assigned to them until they have made the advance payment.

Each student must supply her own text-books. Books will be furnished at publishers' prices, with cost of handling added.

All communications of inquiry, requests for catalogues, etc., should be made to the President.

In writing, always give your county as well as postoffice. The School has to do with counties and cities, not postoffices. If you wish your letter to receive prompt attention, give your county, even though you live in a town.

Each student is allowed a reasonable number of articles in the laundry each week, but elaborately trimmed garments are not received.

The Dormitory accommodates four hundred ten students. For applicants in excess of this number board is obtained in private families at prices about equal to those given above. No student, however, is allowed to board outside of the building without the consent of the President.

ENTRANCE REQUIREMENTS AND CLASSIFICATION.

The course of study (see page 34) is arranged by terms, the A classes being offered in the fall and the B classes in the spring term. The work of the fall term is not repeated in

the spring term, hence it is much better for students to enter in September than in February.

In classifying pupils, the aim is to make their classification as nearly regular as possible, yet the graded system is not strictly adhered to.

The following are the general regulations governing entrance and classification:

1. Graduates of approved* high schools are admitted to Professional Course II or Professional Course III (see pages 36 and 37), those from four-year high schools to receive the Full Diploma upon the completion of this course, and those from the three-year high schools the Normal Professional Certificate. Graduates of three-year high schools wishing the Full Diploma are required to take one year of academic work before entering upon the professional work. The work of this year is to be selected by the committee on classification to fit the case in question.

Graduates from four-year approved high schools are admitted to the Kindergarten Course, and upon the completion of this course receive the special diploma of the course.

Let it be distinctly understood, however, that all applicants for the Kindergarten Course *must* meet the musical requirements (see Kindergarten Diploma, page 32).

Graduates from either the three- or four-year high schools may, if they wish, take the professional year of the Elementary Course and receive the special first-grade certificate provided for this course (see page 32).

2. Students coming from approved high schools *before graduating* are fitted into the Academic Course or into the Elementary Course as they may prefer.

3. Students coming from colleges, academies, or private schools, having done the equivalent of high school work, are admitted upon trial, subject to the same conditions as high school graduates. Those not having done the equivalent of high school work are fitted into the Academic Course, or into the Elementary Course, as they may prefer.

*See "Accredited Schools," p. 30.

4. All students not classified as mentioned above are required to take entrance examinations for the second year of the Academic Course. These examinations presuppose one year of high school work. The effort is being made to gradually eliminate the first and second years. Hence only a limited number will be admitted to these classes this year and all students who can get the equivalent work at home are urged to do so.

5. All candidates for admission by certificate must file with the Classification Committee, not later than September 1st, their certificates of preparation, made out on the blank furnished by the registrar. These blanks must come from some recognized institution or accredited school, must be made out by some member of the Faculty, and must bear the signature of the head of the school from which they come. They must come direct to the Classification Committee and not through the hands of the candidate in question. The persons filling out these blanks are requested to make them as full, explicit, and definite as possible.

Certificates of preparation from private tutors and from ungraded rural schools will not be accepted. Students thus prepared must in all cases take the entrance examinations.

6. All classification based upon certificates and diplomas from other schools is conditional. If at any time the student shows inability to do the work of any class to which she has been thus admitted, she is assigned to a lower class at the discretion of the teacher of that department.

7. Teachers of public schools are admitted to any classes they are prepared to take without examination on a basis of their licenses, and without tuition fees.

8. In the professional years, because of the strictly technical nature of the work, no credit is given for courses completed at other institutions.

9. Students who reënter school after an absence of a year or more will be admitted without examination, but they will be expected to conform to the requirements of the later catalogue—not of that under which they first entered.

10. Students other than those within *one year* of the Professional Courses will be required to follow the Course of Study as outlined in the present catalogue, substituting year for year, but will be allowed to receive the diploma of the catalogue under which they entered, provided they complete the course in due time.

ACCREDITED SCHOOLS.

A four-year high school to be approved must have at least sixteen units of work as specified below, and a teaching force equivalent to the entire time of three teachers.

A three-year high school to be approved must have at least twelve units of work and a teaching force equivalent to the entire time of two teachers.

A unit is a year's work in any high school subject, covering five periods a week, of at least forty minutes, during not less than thirty-six weeks, and constituting approximately a quarter of a full year's work. In other words, sixteen units will not be credited if done in less time than four years, nor twelve units if done in less than three years. For schools in which the number of periods given to any study, or the length of the period is below the standard here specified, the credit for such study will be reduced *pro rata*. In the scientific subjects two hours of laboratory instruction will be counted as the equivalent of one hour of recitation.

Of the units offered by a four-year high school there must be four in English, three in Mathematics, two in History, and two in *Science.

Of the units offered by a three-year high school there must be three in English, two in †Mathematics, two in History, and two in *Science.

* Of this Science one must be Physics or Chemistry.

† Of this Mathematics, one must be Plane Geometry.

The remaining units may be selected from the following list:

SUBJECTS FROM WHICH UNITS MAY BE SELECTED.*

<i>Subject</i>	<i>Topics</i>	<i>Units</i>
English:	Grammar and Composition.....	1
	Rhetoric and Composition.....	1
	English Literature, with critical study of selections American Literature, or critical study of any portion of American, or of any portion of English Literature.....	1
		1
Mathematics:	Algebra, to Quadratic Equations.....	1
	Secondary Algebra completed.....	1
	Plane Ceometry.....	1
	Solid Geometry.....	$\frac{1}{2}$
	Plane Trigonometry.....	$\frac{1}{2}$
History:	Ancient History.....	1
	Mediæval and Modern European History.....	1
	English History.....	1
	American History and Civil Government.....	1
Latin:	Grammar, Composition and Translation.....	1
	Cæsar's Gallic Wars, I-IV; Grammar, Composition Cicero's Orations (6); Grammar, Composition....	1
	Virgil's Æneid, I-VI; Grammar, Composition.....	1
		1
German:	Grammar, Composition, and Translation.....	1 to 3
French:	Grammar, Composition, and Translation.....	1 to 3
Science:†	Physical Geography.....	1
	Chemistry with Laboratory work.....	1
	Experimental Physics.....	1
	Botany	$\frac{1}{2}$
	Zoölogy	$\frac{1}{2}$
	Agriculture	$\frac{1}{2}$
		$\frac{1}{2}$
	Drawing	1 to 3
	Manual Training.....	1 to 3
	Domestic Science.....	1 to 2

*It is understood that the units as credited in this list cover the required time and refer only to high school work.

†High school courses in Science, otherwise adequate, will be allowed only half credit unless field work and individual laboratory work have been done and attested either by certificate or by the presentation of properly certified note books.

NOTE: A list of approved high schools is being made and will be published in next year's catalogue.

DIPLOMAS AND CERTIFICATES.

Two diplomas and two certificates are offered: The Full Diploma and the Kindergarten Diploma; the Normal Professional Certificate and the First Grade Certificate.

1. *The Full Diploma*: This diploma is given upon the completion of either of the Professional Courses (see pages 36 and 37), provided the student has had as foundation for her professional work any one of the following: the four years of the Academic Course (see page 34); a diploma from an approved *four*-year high school, or its equivalent; or a diploma from an approved *three*-year high school, or its equivalent, with one additional year of academic work done in this school.

The Full Diploma entitles the holder to a Full Normal Professional Certificate, given by the State Board of Examiners and Inspectors. This certificate continues in force for ten years and may be renewed for ten years.

This certificate replaces the certificate formerly called "Collegiate" and is of the same grade and duration.

2. *The Kindergarten Diploma*: This diploma is given upon completion of the Kindergarten Course (see page 37). The entrance requirements for this diploma are the same as for the Full Diploma together with sufficient knowledge of instrumental music to enable the applicant to play simple marches with ease. She must also be capable of leading the children in the singing of simple songs. The student's ability in music is tested by the Supervisor of the Kindergarten.

3. *The Normal Professional Certificate*: This certificate is given upon the completion of either of the Professional Courses (see pages 36 and 37), based upon either of the following: the first three years of the Academic Course (see page 34); or a diploma from an approved *three*-year high school or its equivalent.

This certificate replaces the old "Professional Diploma," has the same requirements and is of the same grade and duration: namely, continues in force for seven years and may be renewed for seven years.

4. *The First Grade Certificate*: This certificate is given upon the completion of the Elementary Course (see page 38). It continues in force for three years but is not renewable.

Let it be understood that no student is counted worthy of a diploma or certificate, whatever may be the grade of her academic attainments, who has not been found uniformly dutiful and trustworthy.

RECORD OF STUDENTS.

A record of each student's work is kept in the President's office.

Bi-weekly reports from the various members of the Faculty are handed in, and every student who has not made a passing grade for that time is notified of the fact.

At the close of the fall and spring terms reports for the half-session are sent to parents and guardians.

The work of students is graded as follows: excellent, very good, good, fair, and poor. Fair is the passing grade, except in the professional classes, where good is required in English, History, Government, Geography, Arithmetic, Reading, and Teaching.

*The effort is being made to gradually eliminate the First and Second Years, therefore, all students who can get this work at home are urged to do so.

**Students taking Group I are in line for Professional Course I, those taking Group II are in line for Professional Course II.

†Students who elect the Manual Training and Drawing of the Second Year must continue these subjects in the Third and Fourth Years.

The five periods in Elementary Biology, being largely laboratory work, count as three on the schedule.

‡This course in Chemistry is required in the Fourth Year of those students who did not elect it in the Third Year. Chemistry (82 a, b) is provided for those students who elected Chemistry (81 a, b) in the Third Year and wish to continue the subject with reference to teaching in high schools.

The six periods of Chemistry, being largely laboratory work, count as four on the schedule.

§This selection will depend largely upon which Group was elected in the First Year and must also receive the sanction of the Schedule Committee.

Students who have had Chemistry (81 a, b) in the Third Year must take three or four more periods of elective work in the Fourth Year.

NOTE: The letters A and B indicate respectively the Fall, or A Term, and the Spring, or B Term. The figures under these letters show the number of forty-five-minute periods per week.

The numbers and letters in parenthesis refer to the numbers of the courses as written up under the various departments. A number followed by "a," as Algebra (71 a), indicates a course offered in the Fall Term only; a number followed by "b," as Arithmetic (72 b), indicates a course offered in the Spring Term only; a number followed by both "a" and "b," as Reading (25 a, b), indicates a course continuing through both terms. A number followed by no letter indicates a one-term course offered in the Fall and repeated in the Spring for different sections of the same class.

*This course is arranged for those students who wish to teach in the primary grades.

‡Two of these may be omitted.

§This division of the Senior Class is made in order that the students who are teaching in the Training School may have practically all of their time free for Training School work.

‡The work done by Section I in the fall is done by Section II in the spring, and vice versa, with the exception of Drawing, which is offered only in the fall, and, therefore, must be taken in that term by both sections.

¶Taken only one term, and that while teaching in primary grade.

**The Senior Class is divided into two sections, teaching and observing in the Kindergarten and First Grade alternate terms. While teaching in the First Grade the observation extends through the Primary Grades.

NOTE: The Senior Class of the Kindergarten Course of 1912-1913 will take the work as outlined in the present catalogue, with this exception: that History of Education (166) will take the place of Industrial Occupations (184 a).

DEPARTMENTS OF INSTRUCTION

DEPARTMENT OF ENGLISH LANGUAGE.

Spelling, Grammar, Composition, Rhetoric, Methods in Language.

MISS ANDREWS, MISS HINER, MISS SUTHERLIN.

The academic work of this department strives, first of all, for the awakening of a language-sense, a language-conscience, and a language-pride, in the individual pupil—the arousing of a personal interest, on the part of each, in the mother-tongue, and the personal desire to master it as an indispensable tool in making life successful and happy.

It seeks to provide a larger, richer working vocabulary, through wider knowledge and thought, and through definite word-study for the sake of accuracy, interest, variety, force, and beauty. It encourages an educated, refined pronunciation of the familiar but troublesome words of our every-day speech, as opposed to slovenly, slipshod habits of pronunciation on the one hand, and to mere fads and pedantic niceties on the other.

It attempts to give pupils a thorough acquaintance with the simple essentials of elementary English grammar, which are much too important to be learned incidentally above the lower grammar grades. It aims at a reasonable degree of correctness in oral usage, through an earnest study of common errors, their causes and their remedies—the practical application of the serviceable principles of grammar to every-day English.

It tries to make clear and usable the basal facts of composition and rhetoric, and provides much practice in ready writing, aiming to establish the sentence-sense—the appreciation of the sentence as a definite thought-unit, clear and complete, as opposed to the rambling, run-on, and-and type of expression. It makes every effort to express connected thought at all times, both in speech and in writing, without undue awkwardness and embarrassment, but with ease, freedom, and correctness; in short, in a manner that will not be a reproach to the speaker or writer.

It seeks, last of all, to encourage thoughtful, appreciative reading of good literature through an enjoyable acquaintance with a few simple American and English classics, used as supplementary reading in each class.

The professional work of the Junior Year is preëminently a teachers' course.

It is designed, in the first place, to set the feet of student-teachers in those paths of self-effort by which they may reach the mastery of the simple essentials of good, every-day English, and strengthen their expressional powers in conversation and in writing.

In the second place, it aims at a breadth of view, a catholicity of spirit regarding the whole language question, not possible in any lower class. The study of good text-books is supplemented and enriched by the required reading of pedagogical works and magazines bearing directly upon the English situation. In addition, students are encouraged to cultivate the love of general literature for its own sake, as well as for the added impetus thus given to the cause of good English.

Again, the attempt is made to give pupil-teachers the right attitude toward English training, to arouse a language-patriotism, and show to each her individual duty to the mother-tongue. The course seeks to dignify and magnify the office of English in the common schools, and to show that teachers can bring life and interest to school children in the study of the vernacular, and make it one of the most enjoyable subjects of all, as it is the most important.

With the foregoing as a foundation, the last end in view is a discriminating, unprejudiced study of methods or modes of procedure in the class room. No dogmatic presentation of arbitrary, cut-and-dried methods is attempted; rather, the effort is made to stimulate the student-teacher's originality and ingenuity in making her own methods.

The teachers in all departments coöperate with the teachers of English in encouraging good habits in speech and in writing. In every class a student notably deficient in English suffers a corresponding loss in her standing in that class because of such weakness.

The work of this department, by courses, is as follows:

ELEMENTARY COMPOSITION AND GRAMMAR (10 a)—First Year. Composition three periods, grammar two periods a week for term A. Special attention is given this term to oral composition, with the purpose of helping students to overcome embarrassment, disorderly thinking, and stumbling expression, and to acquire freedom and ease, clearness and order, in expressing thought in conversation and in class. Much practice is afforded by the telling of news items, personal incidents and experiences; by the reproduction of anecdotes, stories, and poems; by oral reports based on reading and observation; by topical recitations on the subject matter of composition, or of other subjects, and by extempore discussions of questions pertaining to school life. The pupils make a good beginning in learning to think on their feet, on the instant, and at the same time express their thoughts correctly and exactly. There is also occasional practice in writing.

The grammar of the first term consists of an elementary study of the kinds of sentences according to use—declarative, interrogative, imperative, and exclamatory; the essential elements of the sentence, with a simple view to subordinate elements, especially modifiers, and the most common independent elements; oral and graphic analysis of simple sentences; and studies in sentence improvement through grammatical means.

TEXT BOOKS: Scott and Denney's *Elementary Composition*; Emerson and Bender's *Modern English*, Book II.

SUPPLEMENTARY READING: Wiggin's *Timothy's Quest*, Stockton's *Bee-Man of Orn* and *Old Pipes and the Dryad*, and Scott's *The Lady of the Lake*.

ELEMENTARY COMPOSITION AND GRAMMAR, continued (10 b)—First Year. Composition three periods, grammar two periods a week for term B. The emphasis is now shifted to written composition. Frequent five- and ten-minute exercises in ready writing in class provide practice in acquiring freedom and fluency, in establishing the sentence-sense, in developing the paragraph-idea, in choosing words with some appreciation of their fitness, and in mastering the essentials of punctuation, capitalization, and other simple technicalities of

written expression. In addition, there are more extended themes, prepared out of class, to promote the qualities of clearness, order, interest, and originality. Every set of papers is followed up by class criticism and individual conferences.

In grammar, the work of the first term is review, with the addition of the kinds of sentences according to form—simple, compound, and complex; expanded study of all sentence-elements, essential, subordinate, and independent; the parts of speech and their chief functions; analysis of all kinds of sentences; the relation of grammatical correctness to effective expression.

SUPPLEMENTARY READING: Dickens' *Cricket on the Hearth*, and Goldsmith's *Deserted Village*.

ELEMENTARY RHETORIC (11 a)—Second Year. Three periods a week for term A. The elementary principles of composition are briefly reviewed, and followed by a detailed study of the choice and use of words, the forms and qualities of sentences, the structure and requirements of paragraphs, the structure and essentials of the whole composition, with much illustrative material. This careful study of form is accompanied by abundant practice in writing, using as a basis of expression the ideas growing out of the pupil's own experience, imagination, and reading, and keeping always in view the fundamental purpose of expression.

TEXT BOOK: Brooks and Hubbard's *Composition-Rhetoric*.

SUPPLEMENTARY READING: Franklin's *Autobiography*, and Whittier's *Snow-Bound*.

ELEMENTARY RHETORIC, continued (11 b)—Second Year. Three periods a week for term B. The kinds of prose composition are now taken up—description, narration, exposition, and argument, with copious illustrations from literature, much practice in writing, and practical exercises in debate; letters are considered from the standpoint of actual life-practice; figures of speech follow, after which the qualities, elements, and kinds of poetry, as well as the common varieties of verse, are studied, with abundant selections.

SUPPLEMENTARY READING: George Eliot's *Silas Marner*, and Lowell's *The Vision of Sir Launfal*.

ADVANCED COMPOSITION (12 a, b)—Third Year. Three periods a week throughout the year. The course begins with a brisk review and a summary, with the purpose of crystalizing, as it were, the main principles of expression studied and applied in all preceding classes, and shaping and organizing them into permanent and usable possessions of the students. The final attempt is made at the mastery of the letter, the one universal practical type of composition. Particular attention is given to the paragraph, its types and its qualities, with frequent ready-writing exercises in the development of single paragraphs. More advanced practice in real invention is provided in all kinds of prose composition, special attention being given to debate and to the short story. When time permits, the term closes with a second view of versification, and some very simple attempts at writing verse—first, such lighter varieties as jingles, drolls, limericks, and school songs, followed by a few more dignified forms, such as hymns, ballads, odes, and lyrics.

REFERENCE BOOK: There is no prescribed text book, but each student is required to provide herself with Woolley's *Handbook of Composition* for reference concerning matters of form and technique.

SUPPLEMENTARY READING: Dickens' *A Tale of Two Cities*, and Ruskin's *Sesame and Lilies*.

ADVANCED RHETORIC (13 a, b)—Fourth Year. Three periods a week throughout the year. The work of this year is intended to guide students into an understanding of the higher, finer stylistic qualities of expression that are practical enough for the class room. The subject matter of the text and the supplementary illustrations are considered from the literary and critical as well as the technical standpoint.

TEXT BOOK: Genung's *Practical Elements of Rhetoric*.

SUPPLEMENTARY READING: First Term—Charlotte Brontë's *Jane Eyre*, and Coleridge's *Rime of the Ancient Mariner*. Second Term—Scott's *Quentin Durward*, and Tennyson's *Idylls of the King*.

ADVANCED GRAMMAR (14 a)—Junior Year of Courses I, II, and III, and Professional Year of Elementary Course. Three periods a week for term A. This course presupposes a good knowledge of elementary grammar as a basis for a broader view of the whole field of descriptive grammar, aiming primarily at giving pupil-teachers a deeper, surer knowledge of the subject matter of grammar. New light and interest are afforded by frequent touches of comparative and historical grammar. The language is considered mainly from the functional side in such a way as to provide training in the actual processes of thinking. It is looked at as a living growth determined by the needs, habits, and social obligations of a living people, and emphasized, therefore, as a record of usage rather than as a law of usage.

The subject-matter themes for discussion include, among others, the following: the sentence and all its elements, with the logical necessity therefor—analysis; nouns and their function in thinking and in the expression of thought, with a brief introduction to the historical study of names; the personal pronouns, with their history, forms, and uses; case and its functions; modifiers, their form and their service in our thinking; above all, the verb and the verbals, in all important phases and functions. There will be, in addition, a discussion of such professional topics as may prove most helpful to the class, including the historical development of grammar teaching, the place and serviceableness of grammar in the elementary school, the practical relation of grammar to language work, and methods of teaching grammar.

Some necessary practice in composition is also provided during this and the following term, but any student notably deficient in the simple essentials of English composition will be sent back to a lower class in composition to repair such weakness.

TEXT BOOK: Buehler's *Modern English Grammar*, with references to many other good grammars.

SUPPLEMENTARY REFERENCE BOOKS: A good dictionary, preferably Webster's *Academic Dictionary* or Webster's *High School Dictionary*, and Woolley's *Handbook of Composition*—for ready reference in technical matters—must be owned by every student of the professional English classes.

METHODS IN LANGUAGE (15 b)—Junior Year of Courses I, II, and III, and Professional Year of Elementary Course. Three periods a week for term B. This course presents, as fully as possible in the time allowed, the essentials of matter and method in the language work of all grades in the public school above the second. Among the topics studied are the following: the purpose and plan of the language work; language environment; the relation of language to other subjects; coöperation in English; language and character; the child's activities as a basis for language; literature as a basis for language; vital points in language teaching; the course of study in language; English for rural schools; problems of language in the one-room school; the importance of oral training in language; the types of oral lessons—the conversation lesson, the story lesson, poem study, the oral report, dramatization, the discussion of a picture, the lesson in usage; the value and method of memorizing poems and short passages of prose; the function of written work; the types of written lessons; the correction of written work; spelling and word study; the use of the dictionary; the inexpensive collection of materials for language work.

TEXT BOOK: McMurry's *Special Method in Language*, with parallel reading of selected chapters from Chubb's *The Teaching of English*; Carpenter, Baker and Scott's *The Teaching of English*, and others.

SUPPLEMENTARY READING: Palmer's *Self-Cultivation in English*.

SPECIAL SPELLING—Two periods a week as long as necessary. This special class is formed the first of October. To it are assigned all students from any class, who, during the first month's work, show weakness in spelling. Other students are required to enter the class later, as it may seem necessary, and all will be kept there until decided and permanent improvement is shown. The professional classes will be watched with especial care, and *no student notably poor in spelling will be allowed to graduate until such weakness is remedied*. Since it is the special object of this course to remedy marked weakness in spelling, earnest and intense study is given to every possible principle, plan, or device that may appeal to the eye, the ear, the hand, and the intellect, in impressing correct word-forms upon the memory.

TEXT BOOK: Payne's *Common Words Commonly Misspelled*.

DEPARTMENT OF LITERATURE AND READING.

LITERATURE.

MR. GRAINGER.

The work of this department aims to give the student a love for the best literature, a desire to read and study it, and some ability to judge it. Under the teacher's direction the classes make critical studies of representative masterpieces and discuss the required reading. They also prepare written reports on parallel reading. From their study of the various kinds of writing, the students are led, during the three years' course, to form some conception of each of the leading types of literature, and additional ground-work for future study is laid by taking a general view of the historical development of English and American literature. Reference to the best biography and criticism gives the pupil a sense of the personality of great writers and a living interest in their work. Many of the masterpieces read and studied are selected from the literature required for college entrance.

The work of this department, by courses, is as follows:

OLD STORIES (20 a)—Second Year. Three periods a week for term A. This course aims to lay the foundation for future work in literature by familiarizing the student with such of the more important commonplaces of literary allusion, reference, and tradition, as will widen the imaginative reach and increase the equipment for teaching in the grades. A translation of the *Odyssey* and the classic myths connected therewith, stories from the Old Testament, and stories of *King Arthur* are read and studied for their beauty and meaning and with reference to their best expression in English and American literature. In the *Odyssey* the student observes the characteristics of the folk epic as a type.

TEXT BOOKS: Palmer's *Translation of the Odyssey*; Stevens and Allen's *King Arthur Stories*. Gayley's *Classic Myths* is recommended for reference.

PARALLEL READING: Hawthorne's *Wonder Book* and *Tanglewood Tales*; selected books from the Old Testament.

AMERICAN LITERATURE (21 b)—Second Year. Three periods a week for term B. Representative work of the chief Southern writers is studied with a view to arousing an interest and a just pride in the excellent literary product of our own section, and to seeing what our writers have made of familiar material. The field is then broadened, with much the same purpose, to a national scope by the study of the literature of other sections, especially of New England. As the most distinctly American type, the short story is studied particularly in the work of Poe and Hawthorne. The reading and class discussion of stories in the current magazines is also made a part of this study. A brief outline of the development of literature in America is given at the end of the term.

TEXT BOOKS: Mims and Payne's *Southern Prose and Poetry, Literary Masterpieces*; Tappan's *History of American Literature*.

PARALLEL READING: A list of American short stories to be read during the study is posted on the bulletin board near the beginning of the term.

ENGLISH LITERATURE (22 a, b)—Third Year. Three periods a week throughout the year. Though the course in English Literature gives attention to the literary history, the work is based on the study of representative masterpieces and their authors, and of significant literary types, rather than of historical development. In the first term a study is made of the lyric as a type, especially in the works of Burns, Wordsworth, Shelley, and Keats; and of the essay, especially in the works of Carlyle, Macaulay, Arnold, and Lamb. These writers and their works are considered as the typical expression of their times. A number of representative English essays are also required as parallel reading.

The ballad, the epic poem, and the novel, being the leading types of narrative literature in English, form the main subject for study in the second term. The specimens selected are taken up in chronological order, so that the study of them may be accompanied by a rapid survey of English literary history, and may be closely correlated with the study of English politi-

cal history. The poems are taken from the following: Beowulf (in translation), the English and Scottish ballads; Chaucer, Spenser, Shakespeare, Milton, Pope, Scott, Coleridge, Tennyson, Browning, and Arnold. The novels are selected from the works of Dickens, Thackeray, and George Eliot.

Parallel reading includes narrative poems and novels from such of these writers and others as are not studied in class.

TEXT BOOKS: To be selected as needed.

ENGLISH CLASSICS—VICTORIAN POETS (23 a)—Fourth Year. Elective. Three periods a week for term A. Mrs. Browning, Robert Browning, Tennyson, Arnold, and Kipling are selected for study.

ENGLISH CLASSICS—SHAKESPEARE (23 b)—Fourth Year. Elective. Three periods a week for term B. Two important plays of Shakespeare, a comedy and a tragedy, are read and carefully studied as representatives of the two types of drama. As such they are compared with specimens of plays on the stage to-day and then with the earliest forms of English drama. After the development of the type from these early examples has been traced rapidly, along with the history of the theater to Elizabethan times, Shakespeare's life and the development of his art are studied in connection with five or six plays, which are taken up in chronological order.

READING.

MISS WHEELER.

"It is a great thing to be able to read a page of English."

In the reading course an effort is made to establish high ideals of expression and interpretation. The course aims not only to train the pupil in the mechanics of reading—articulation, pronunciation, fluency, readiness—but to stimulate imagination, quicken responsiveness, and increase the power of getting thought from the printed page. The pupil learns to go to the text for guidance as to the expression of any given passage, rather than to depend upon arbitrary rules. It is designed to make every reading lesson primarily a lesson in

thought-getting; and the practice in apprehending and expressing shades of thought should be of value to the pupil in all school work.

A professional course in Reading and Methods is offered. This course attempts to acquaint the student with the criteria of vocal expression, and discusses the best methods of instruction.

The work of this department, by courses, is as follows:

READING (25 a, b)—First Year. Two periods a week throughout the year. The work is designed to cover a wide range of emotion and expression. In addition to the reading the course will include the memorizing and rendition of extracts from both volumes of the "Evolution." Special attention will also be given to constant practice in sight reading, so that the pupil may acquire the ability to read aloud at sight with animation and ease.

TEXT BOOKS: Emerson's *Evolution of Expression*, Vols. I and II; Wiggin's *Timothy's Quest*, and Dickens' *Cricket on the Hearth*.

READING (26 a, b)—Second Year. Two periods a week throughout the year. The work of the first year is continued, the aim being to develop still further the pupil's power to express thought and interpret literature intelligently and adequately.

TEXT BOOKS: Emerson's *Evolution of Expression*, Vols. III and IV.

READING AND METHODS (27)—Junior Year of Courses I and II and Professional Year of Elementary Course. Three periods a week for one term. This course aims to improve the pupil's own reading, and to give her, as a teacher of reading, definite standards of criticism.

It includes discussion of methods, application of standards of criticism, outlines and plans of lessons made by the pupils, and practice-teaching before the class. The twofold aim of oral reading—to get the thought and to give the thought—is emphasized throughout the course.

TEXT BOOKS: Briggs and Coffman's *Reading in Public Schools*; Haliburton and Smith's *Teaching Poetry in the Grades*.

DEPARTMENT OF HISTORY AND SOCIAL SCIENCES.

MR. LEAR, MISS BUGG, MISS CRAWLEY.

The work of the first two years of the Academic Course is intended to make the student conscious of the vastness and dignity of the province of history, to enlarge her sympathies and appreciations, and to bring her to regard history not as a series of disconnected facts, but as the life story of humanity, and to realize that even the vicissitudes of nations are but incidents in the study progress of the race. Instruction in methods of study is given frequently and persistently.

The elective courses in history, economics, and sociology are designed to give the student who is fond of history an opportunity of pursuing the subject further and of gaining an introduction to the kindred sciences. She may thus fit herself for the teaching of history in the high school as well as in the grades.

The aim in the Junior and Senior years is to prepare the student to teach American History and Government. It undertakes to make the knowledge gained in the grammar grades fuller, clearer, and more exact; to call attention to movements and tendencies; to point out the many causes of an important event, and, in turn, its many effects, and to trace the casual relation through several steps and across wide intervals. The question as to what should constitute the subject matter of a course in history and civics for the grades is considered, and the outline of such a course is formulated. Methods of presenting the proposed work to children are then suggested and discussed.

The work of this department, by courses, is as follows:

ANCIENT HISTORY (30 a, b)—First Year. Three periods a week throughout the year. The work covered in this year extends from the earliest times to 800 A. D.

TEXT BOOK: Botsford's *Ancient History for Beginners*.

MODERN HISTORY (31 a, b)—Second Year. Three periods a week throughout the year. The thread of European history is followed from the time of Charlemagne down to the present day.

TEXT BOOK: West's *Modern History*.

ENGLISH HISTORY (32 a, b)—Third Year. Elective. Three periods a week throughout the year. A survey of English History from the earliest times to the present is attempted. Social and industrial development and the growth of the political power of the people are the two phases that receive chief attention. In order to gain time for these studies all save the most highly significant events in the military history and foreign political relations of England are omitted from consideration.

TEXT BOOK: Cheney's *Short History of England*.

ECONOMICS (33 a)—Fourth Year. Elective. Three periods a week for term A. The courses previously required in commercial geography and in the economic history of the United States may be expected to equip the student with a very considerable number of economic facts which will help her now to reach an understanding of the general laws that everywhere and under all conditions govern the business relations of men.

TEXT BOOK: To be selected.

SOCIOLOGY (34 b)—Fourth Year and Junior Year of Course III. Elective. Junior Year of Kindergarten Course. Three periods a week for term B. The present social structure and social conditions in America are studied, and efforts now being put forth toward social betterment are discussed. Especial attention is given to educational activities.

TEXT BOOK: To be selected.

AMERICAN HISTORY AND METHODS (35 a, b)—Junior Year of Courses I, II and III, and Professional Year of Elementary Course. Three periods a week throughout the year. In this year the survey of the history of our country is first completed and then a study is made of the methods of teaching history in the grades.

TEXT BOOK: James and Sanford's *American History*; the McKinley *Outline Maps*.

AMERICAN GOVERNMENT AND METHODS (36)—Senior Year of Courses I, II and III. Three periods a week for one term. The various forms of local government found in our country are studied in their present development and are rapidly traced back through American and English History to the political institutions of the Saxons. The local governments of Virginia are carefully examined in detail, both for their own sake and as types. The state governments are followed from the earliest times down to the present, Virginia being again taken as a type. The history of the formation of the Federal government is reviewed, and its present workings considered.

Through special reports based upon parallel reading an attempt is made to awaken a keener interest in present-day civic questions such as parcels post, the referendum, city government by commission, etc.

The work of the term concludes with a brief consideration of the methods of teaching civil government in the grades.

TEXT BOOKS: Forman's *Advanced Civics*, Smithey's *Civil Government of Virginia*.

CIVICS (37 a)—Two periods a week for term B. In this course the main topics covered in the work of the Senior Year in government are presented in more elementary form.

UNITED STATES HISTORY—This course is offered in the spring term for the benefit of those students who can not return to school, but wish to take the State examination for teachers' certificates.

DEPARTMENT OF LATIN.

MISS RICE.

In the study of Latin, the following objects are kept in view :

1. Etymology of English words of Latin origin. Pupils are encouraged to look for the English derivatives of Latin words with correspondences and differences in shades of meaning.

2. Comparative Grammar. Roman forms of thought are examined in order to make a comparison with English forms. A pupil never knows that his own language contains idioms until he has studied some language other than his own. The study of one language throws light upon another.

3. Mental Discipline. The expression in the equivalent forms of one language of the thought gained in another gives power.

An effort is made throughout this work to study the government and the private life of the Romans as well as their literature and language.

The work of this department, by courses, is as follows :

BEGINNERS' LATIN (40 a, b)—First Year. Group II. Five periods a week throughout the year. Drill in the forms of inflection and the essentials of syntax; derivation of words; translation of easy Latin prose into English and English into Latin.

TEXT BOOKS: Ritchie's *First Steps in Latin*; Janes and Jenks' *Bellum Helveticum*.

CÆSAR (41 a, b)—Second Year. Group II. Five periods a week throughout the year. More difficult prose; exercises based upon text; short course in grammar; critical study of the most difficult constructions in Cæsar.

TEXT BOOKS: Cæsar's *Gallic Wars*, Books I, II, III, IV; Bennett's Grammar; D'Ooge's *Latin Composition*, Part I.

PARALLEL READING: *Life and Times of Cæsar*.

CICERO (42 a, b)—Third Year. Elective. Three periods a week throughout the year. In *Catilinam* I and II, *Pro Lege Manilia*, and *Pro A. Licinio Archia*; exercises based upon the text; syntax of cases and verbs.

TEXT BOOKS: *Cicero*; Bennett's *Grammar*; D'Ooge's *Latin Composition*, Part II.

PARALLEL READING: *Life and Times of Cicero*.

VIRGIL (43 a, b)—Fourth Year. Elective. Three periods a week throughout the year. Four Books of the *Æneid*; the elements of Latin versification.

TEXT BOOK: *Virgil*.

PARALLEL READING: *Life and Times of Virgil*.

DEPARTMENT OF MODERN LANGUAGES.

MISS SMITHEY.

In addition to the general disciplinary value that comes from the serious study of a language other than the mother tongue, the work in French and German is designed to develop the following:

1. Mental Alertness. By training the tongue, the ear and the eye, pupils are made more alert, quicker to receive impressions, and more ready to impart their own thoughts to others. Thus they become more wide-awake.

2. Feeling for the language. An effort will be made from the first lesson to enable the pupil to grasp the thought from the French or German without the aid of translation. This will give an appreciation of the beauty and genius of the language and literature, and an insight into the life and heart of the people that will never come to those who merely translate from one language into another.

3. The enlargement of ideals. The opening up of a new literature to one carries with it the privilege of entering into the intellectual and emotional life of its people. Any serious study of the manners and customs, the ideals and institutions, the successes and failures of another nation, must broaden the sympathies and give a larger view of life.

The work of this department, by courses, is as follows:

FRENCH (50 a, b)—Second Year. Group II. Three periods a week throughout the year. In the first term the elements of the language are studied through the medium of the language itself. Frequent exercises in the simplest forms of sentence structure are required. Dictation in French is begun the first week, and is continued throughout the entire course. In the second term simple original compositions in French are assigned. Easy prose and a few lyrics are studied.

TEXT BOOKS: *Méthode Berlitz, Premier Livre*, and Guerber's *Contes et Légendes*.

FRENCH (51 a, b)—Third Year. Elective. Three periods a week throughout the year. The study of French Grammar from a text book is begun in this class. French composition is continued. Translation of French into English and connected passages from English into French is a part of the work of this class. In the second term much oral and written reproduction in French of stories and anecdotes read in class is required. Every effort is made to stimulate students to become independent in grasping the thought and in forcing the meaning of new words from the context.

TEXT BOOKS: Bruce's *Grammaire Française*, Coppée's *Le Luthier de Crémone et Le Trésor*, Labiche's *La Cigale chez Les Fourmis*, and Legouvé's *Le Voyage de Monsieur Perichon*.

FRENCH (52 a, b)—Fourth Year. Elective. Three periods a week throughout the year. Students having completed the work of Courses 50 a, b and 51 a, b should be prepared to begin the study of French literature. Some selections from the writers of the Seventeenth Century that will be helpful in throwing light upon the social and literary conditions of that period are read. One play by Corneille, Racine and Molière will be studied. In the second term the work will be based on some of the writers of the Nineteenth Century. A few of the best lyrics will be read. The texts for these courses may be changed from year to year.

GERMAN (53 a, b)—Second Year. Group II. Three periods a week throughout the year. The work of this year is similar to that of the second year in French. Much oral drill is given, so that students may acquire fluency in pronunciation and some feeling for the language. In the second term short original papers in German are required.

TEXT BOOKS: *Méthode Berlitz, Erstes Buch*, and Guerber's *Märchen und Erzählungen*.

GERMAN (54 a, b)—Third Year. Elective. Three periods a week throughout the year. The study of grammar from a text book is begun in this class. Translation from German into English and much reproduction in German of texts read

in class form a part of the work of this term. In the second term more difficult texts are read, but the character of the work is the same.

TEXT BOOKS: Thomas's *Practical German Grammar*, Andersen's *Bilderbuch ohne Bilder*, and Storm's *Immensee*.

GERMAN (55 a, b)—Fourth Year. Elective. Three periods a week throughout the year. The leading facts in the development of the German literature will be taken up. Some ballads and lyrics studied. In the second term some study of the writers of the present day will be made. Much sight reading will be done in this year. The texts for these courses may be changed from year to year.

DEPARTMENT OF MUSIC.

MISS PERKINS.

The general aim of this department is to emphasize the intellectual, æsthetic and social values of music, to broaden the popular conception of its function in the public school and prepare students to teach it.

The specific aims are:

(a) To develop the individual student along musical lines by encouraging the independent and intelligent interpretation and expression of musical thought.

(b) To cultivate the musical taste through the study of classical and standard compositions which have a permanent literary as well as musical value.

The work of this department, by courses, is as follows:

MUSIC (60 a, b)—Second Year. Two periods a week throughout the year. This course is designed for beginners in sight singing and consists of such theory as is necessary to the intelligent reading of the selections contained in the first two books of the average school text-book series.

The major scale, octave, tonic arpeggio and tetra chord considered as type forms to facilitate phrase reading. Signatures of the nine common keys developed from scale ladders. Analysis and application of time signatures through study of the varieties of rhythm. Reference to the structure of the chromatic scale as the introduction of chromatic intervals in a selection requires it. Major and minor modes compared through listening to and singing simple melodies.

The voice work of the first term is entirely unison to secure accuracy of intonation through easy breath control and correct tone placing.

Part singing is introduced during the second term through canons, rounds and simple two-part songs. In all song work, special attention is given to the adaptation of the words to the music and varieties of shading in expression as indicated by the content of the song and the dynamic signs.

The vocal work is supplemented by written work as a further means of ear and eye training.

TEXT BOOKS: First Book, *Modern Music Series* and Weaver's *Individual Sight Singing Method*.

MUSIC (61 a, b)—Third Year. Two periods a week throughout the year. Thorough review of all technical work of second-year course. Chromatic scale developed and reproduced in eleven keys. Study of the minor scale in its several forms as related to the major and the use of the minor mode in music. Structure and location of the major and minor triads of the major scale. Common forms of modulation. Simple exercises in transposition. The most common intervals of two-part songs during first term. Three-part work introduced in last half of term.

TEXT BOOK: Second Book, *Modern Music Series*.

MUSIC (62 a, b)—Fourth Year. Elective. Two periods a week throughout the year. This course includes a survey of the music of ancient and primitive periods and traces the development of modern music up to the present time. A classification of the most important vocal and instrumental forms is made with particular stress on folk music, considered from the historical and literary as well as musical viewpoint, and a typical song of each nation is learned.

The second term is devoted to the study of the lives of composers and their most noted compositions.

The piano and victrola are used for illustrative purposes.

TEXT BOOK: Baltzell's *History of Music*.

MUSIC (63 a, b)—Junior Year of Course I. Two periods a week throughout the year. This course presupposes the completion of the second- and third-year courses. It is supplemented by such facts of musical history as are suggested by the content of subject matter and as are necessary for the stimulation of interest in the subject and a clearer understanding of certain musical forms.

A comprehensive course in methods, including the work through the seventh grade, is given by lectures and various reference texts.

TEXT BOOKS: Alternate Third Book, *Modern Music Series*, Bertenshaw's *Elements of Notation*, and Rix's *Manual of School Music*.

MUSIC (64 a, b)—Junior Year of Course II. Two periods a week throughout the year. This course is designed for graduates of high schools. The work is similar to that of the second and third years with the addition of a short course in methods.

TEXT BOOKS: *Common School Book of Vocal Music*, Bertenshaw's *Elements of Music*, and Rix's *Manual of Music*.

MUSIC (65 a, b)—Junior Year of Course III and of Kindergarten Course. Two periods a week throughout the year. The first term of this course is the same as the first term of course (64 a, b). The second term includes a review of the subject matter of the previous term which bears directly upon the work of the first three grades of the public school with special attention given to voice study—adult and child—ear training, oral and written—sight reading, rhythmic studies based upon the recurring accent in poetry and song interpretation.

A study of the complete song as the basis of the child's musical education is made under the following topics: The selection of songs, (a) with reference to their vital relation to the child's interests and activities, (b) with reference to their melodic and rhythmic construction as the true interpretation of their content, (c) with reference to the child voice; methods of teaching the song; observation of the simpler elements of the song, such as the phrase, the measure, the beat, the accent, the rhythm and the scale relationship of tones; transition from rote to note singing through the formal study of intervals introduced orally: visualization of the song as preparation work leading to formal sight reading.

The use of the chromatic pitch pipe in the frequent and rapid giving of pitch is taught.

A carefully selected list of songs according to grades is made.

SONGS, GAMES AND FOLK DANCES (182 b): Junior Year of Course III and of Kindergarten Course: Three periods a

week for term B. This course is given jointly by Miss Perkins, Miss Smith of the Kindergarten Department, and Miss Overall of the Department of Physical Training.

(a) A special study of songs used in connection with the kindergarten and folk dances will be made with reference to their interpretation through content as well as tonal representation.

(b) Kindergarten games will include the organization of simple activities, interests and experiences of the child into game form, together with sense games, trade games, traditional games and games appropriate for different seasons of the year.

(c) Folk dances will include those involving simple and glide polka steps suitable to primary grades.

A course in musical appreciation is given throughout entire course by means of Victrola records selected especially for that purpose.

A Glee Club composed of forty or fifty members, selected by the director of music from the music classes and best singers of the student body, receives weekly training in two-three- and four-part singing. Public recitals are given once or twice a year.

DEPARTMENT OF MATHEMATICS.

MISS LONDON, MISS JARRETT, MISS HARRISON, MISS BLACKISTON.

In this department courses are offered in academic and professional arithmetic and in secondary algebra, geometry, and trigonometry. The purpose of the academic work in arithmetic is to review and supplement the student's knowledge of the subject, to correct errors, crudities, or imperfections which may remain from previous teaching; and to train the student in neat and systematic arrangement of written work, as evidence of orderly thinking.

The aim is made to have the student see the unity of the subject, the few underlying principles, and the relation and dependency of all subsequent work upon these few principles, showing that each is merely another language for the solution of the problems of the other.

The solution of every problem in arithmetic involves seeing relations and calculating values. Arithmetical training should develop power in one, and accuracy and rapidity in the other. For this purpose much illustrating, diagramming, and practical measurement work is done. Clearness of statement in both oral and written work is insisted upon, in recognition of the fact that mathematics is the science of order, and that no better opportunity can be afforded for drill in neat habits, and in the use of truth-telling, carefully chosen English.

The aim of the professional work in arithmetic is to train the students to teach arithmetic. To do this successfully it is necessary, first, that they know the subject matter; second, that they know the best methods of presenting it; and, third, that they have a real and living interest in the subject and a comprehensive appreciation of its place in the school curriculum.

With these ends in view, the first term is devoted to a study of the subject from the teacher's point of view. A brief discussion of the value of arithmetic as a culture and ethical study, of the historical development of arithmetic as a science, and of the various leaders who have undertaken in our day to reform and systematize the teaching of the subject is intended

to give the student a better point of view from which to see the relative importance of the various topics of this branch of knowledge.

The work is taken up both topically and by grades, and the most approved methods of teaching the subject discussed.

The second term is given to a review of the subject matter. A text book is used, and the material is chosen to fit the needs of each particular class.

By an intelligent study of algebra the view of the whole field of mathematics is broadened, the ability to think more abstractly than heretofore is gained, and the reasoning powers are disciplined. Moreover, the understanding of algebraic truths and principles is fundamentally necessary to the further pursuance of mathematics, and also to a clear understanding of the more abstract processes of arithmetic.

The power to see relations, which was developed in arithmetic, is here strengthened by the constant demand to separate the known from the unknown and to see the relation existing between the two in order to obtain the one from the other.

Care, clearness, and accuracy are everywhere insisted upon.

To develop in the student the power of logical, systematic thought, to secure clear and accurate expression, and to strengthen the reasoning powers are some of the most important objects in teaching geometry. With this in mind the work is so arranged that constant emphasis is laid upon the relation existing between the known and the unknown.

Special attention is given to original work and constructions, in order to develop self-reliance and to stimulate the spirit of inquiry into mathematical truths.

The language of geometry furnishes an excellent drill in exactness of expression—not over-saying nor under-saying the truth.

A short course in Plane Trigonometry is given. The aim of this course is to give as briefly as is consistent with clearness the fundamental principles of the subject, to have the student derive the necessary formulas and then to make the problems as practical and as interesting as possible.

The work of this department, by courses, is as follows:

ALGEBRA (70 a, b)—First Year. Five periods a week throughout the year. The work of the first term includes the

fundamental operations, the use of symbols of aggregation, the combining and simplifying of simple equations, the various methods of factoring, and common divisors and multiples. The work of the second term includes simultaneous equations, involution and evolution, theory of exponents, radicals, and easy work in quadratics.

TEXT BOOK: Milne's *Standard Algebra*.

ALGEBRA (71 a)—Second Year. Three periods a week for term A. An abridged course in secondary algebra is completed, including a review of radicals and of the theory of exponents, and an extension and completion of the work in quadratics. In addition is treated equations reducible to quadratic form, ratio and proportion, and the progressions.

TEXT BOOK: Milne's *Standard Algebra*.

ARITHMETIC (72 b)—Second Year. Three periods a week for term B. The aim of this course is to review, complete if necessary, and extend the previous work in arithmetic. The material is chosen each year to meet the needs of the class.

TEXT BOOK: Stone-Millis' *Secondary Arithmetic*.

PLANE GEOMETRY (73 a, b)—Third Year. Four periods a week throughout the year. In the first term simple geometrical construction work is done. The students are then led to frame and demonstrate theorems based upon these constructions. The ground covered is usually the first two books of Plane Geometry. In the second term an abridged course in Plane Geometry is completed.

TEXT BOOKS: Shultze and Sevenoak's *Plane Geometry*.

SOLID GEOMETRY (74 a)—Fourth Year. Elective. Four periods a week for term A. An abridged course in Solid Geometry is completed.

TEXT BOOK: To be selected.

PLANE TRIGONOMETRY (75 b)—Fourth Year. Elective. Four periods a week for term B. A brief course in Plane Trigonometry is given, with special attention to the practical applications of the subject.

TEXT BOOK: Robbins' *Plane Trigonometry*.

ARITHMETIC AND METHODS (76 a, b)—Junior Year of Courses I, II and III and Professional Year of Elementary Course. Three periods a week throughout the year. The first term of this course is devoted to general work in methods. A standard course of study is outlined, and the most approved methods of teaching the subject in the grades are discussed. The second term is given to a review of the subject matter of arithmetic from the teacher's standpoint.

TEXT BOOKS: J. W. A. Young's *The Teaching of Mathematics*, David Eugene Smith's *The Teaching of Elementary Mathematics*, and Moore and Miner's *Practical Business Arithmetic*.

DEPARTMENT OF PHYSICS AND CHEMISTRY.

MISS WINSTON.

In this department the effort is made to develop the scientific habit of thought, to teach the student to observe accurately and to make application of her knowledge to the facts which are common in her daily experience.

The work of the department, by courses, is as follows:

PHYSIC: (80 a, b)—Third Year. Five periods a week throughout the year. A course consisting of lectures with illustrative experiments, combined with recitations which include solving of numerous problems. The work during the first term includes Mechanics of Solids, Liquids and Gases and Sound. Second term: Heat, Light, Magnetism and Electricity.

TEXT BOOK: Hoadley's *A Brief Course in Physics*.

The prerequisites for Physics are Algebra through quadratic equations, and mensuration in Arithmetic.

*CHEMISTRY (81 a, b)—Third Year, elective. Fourth Year, required. Six periods a week throughout the year, four laboratory periods. Inorganic Chemistry. The first term deals with non-metals. In the second term the metals are studied by means of a brief course in Qualitative Analysis.

TEXT BOOKS: Clarke and Dennis' *Elementary Chemistry*, Irish's *Qualitative Analysis for Secondary Schools*.

†CHEMISTRY (82 a)—Fourth Year, elective. Six periods a week for term A. Four laboratory periods. An advanced course in Qualitative Analysis to follow Chemistry (81 a, b).

TEXT BOOK: To be selected.

†CHEMISTRY (82 b)—Fourth Year, elective. Six periods a week for term B. Four laboratory periods. Organic Chemistry, consisting of a general survey of the chemistry of the compounds of carbon together with the preparation of some of the more familiar compounds.

TEXT BOOK: To be selected.

*Chemistry (81 a, b) is required in the Fourth Year of all students who did not elect it in the Third Year, thus making it an elective subject for the *Normal Professional Certificate*, and a required subject for the *Full Diploma*.

†Chemistry (82 a) and (82 b) are provided for those students who elected Chemistry (81 a, b) in the Third Year and wish to continue the subject, with reference to teaching in High Schools.

DEPARTMENT OF BIOLOGY.

MR. EASON, MISS BLACKISTON.

In this department courses are provided, (1) for students entering for regular work; (2) for students wishing to specialize in this department to fit themselves for teaching the biological sciences; (3) for students preparing to take the public school examinations.

The aim of the work is to develop interest in Nature, to acquire habits of accurate observation, exact statement, and independent thought. It is believed that the study of living organisms, their structure, activities, and relations will give the student a broader and deeper appreciation of all life, while a scientific viewpoint is essential for the solving of many of the problems which confront the public school teacher. This training will better fit her to inspire and direct the spirit of observation and investigation in her pupils, thus carrying into the public schools principles of accuracy and thoughtful inquiry, in addition to a broader love for Nature and an interest in the life-processes surrounding us.

The laboratory is equipped with Bausch and Lomb compound microscopes, black-topped tables, and an aquarium with flowing water, besides various glass aquaria, chemicals, glassware, instruments, prepared slides, material for the preservation and mounting of specimens, charts of the human body, plaster casts of the eye and ear, and limited number of museum specimens—the nucleus of a museum which will grow from year to year.

The work of this department, by courses, is as follows:

ELEMENTARY BIOLOGY (90 a, b)—Second Year. Five periods a week throughout the year. This course is made up largely of Botany, Zoölogy, and that part of Human Physiology which is of biologic interest. The course is divided into three parts:

Field Work—One double period a week, in which frequent excursions to nearby woods, fields and streams are made to study the relations of animals and plants, namely, their mode

of getting a living, their adaptation to environment, the grouping of plants and animals according to their habitats.

In connection with the field work each student is required to make a herbarium of fifty wild flowers and to collect and mount twenty-five insects.

Laboratory Work—One double period a week in which animal and plant forms (chiefly those collected on field trips) are studied in greater detail as to form, structure and activities. Careful notes and drawings are made.

Recitation and Discussion of Laboratory and Field Work—One period a week.

The course is especially designed to stimulate the student's powers of observation in such a way as to gain a practical as well as a cultural value. A study of some of the noxious and beneficial plant and animal forms tends to emphasize the practical side of Biology.

TEXT BOOKS: Hunter's *Essentials of Biology*, Sharp's *Laboratory Guide to Accompany Hunter's Biology*, Coulter's *Analytical Key to the Flowering Plants*.

ADVANCED BOTANY (91 a, b)—Fourth Year, elective. Six periods a week throughout the year. Laboratory and field work two double periods a week, recitation two single periods a week. This course is designed to prepare students to teach Botany in the secondary schools. In addition to covering the general field of Botany, an effort is made to give the students some idea of bacteriological technique and to outline the method of treatment for plant diseases affecting the crops of this region. Practice in histological technique is an essential part of this course.

TEXT BOOKS: Bergen and Davis' *Elements of Botany*, Bergen and Davis' *Laboratory Manual*.

PREREQUISITE: *Elementary Biology*.

HYGIENE (92)—Senior Year of Courses I, II and III and Professional Year of Elementary Course. Three periods a week for one term. This work consists of lectures, recitations and assigned readings on the various phases of Hygiene and Sanitation, in which both civic and personal hygiene are con-

sidered. Special emphasis is laid upon those parts of the subject which will be of value to teachers, for example: school hygiene, public sanitation, first aid to the injured and diagnosis of diseases apt to occur among school children.

TEXT BOOKS: Hough and Sedgwick's *Hygiene and Sanitation*, Allen's *Civics and Health*.

Supplementary assignments are made from Wood's Hutchinsonson's *Preventable Diseases*, Shaw's *School Hygiene* and the Bulletins of the Virginia Health Department.

NATURE STUDY (93)—Senior Year of Courses I, II and III and of the Kindergarten Course. Three periods a week for one term—one single period and one double period. Since Nature Study is the logical beginning of the study of either the natural or the physical sciences the course is so arranged that the students pursuing it will be able to teach the Nature Study and Elementary Science work in the grades.

The aims of Nature Study are to increase the powers of observation and reasoning, to foster an interest in agricultural problems, to cultivate the æsthetic nature and to show the beauty and interest in the commonplace. It gleans from many of the sciences, and by the presentation of such subjects as flower structure, life histories of insects and life in a brook, fills a need by supplying much general scientific knowledge.

The field excursions enable the students to make observations of animal and plant life and to understand better the laws and forces of nature.

TEXT BOOK: Comstock's *Handbook of Nature Study*.

AGRICULTURE (94)—Senior Year of Courses I and II, Elective. Three periods a week for one term—one single period and one double period. The chief aim of this course is to fit teachers to handle intelligently and practically the agricultural work in the rural schools. The course is sufficiently broad to give a knowledge of the fundamental principles of Agronomy, Horticulture and Animal Husbandry and at the same time to give some of the better methods of presenting the subject to the children. Especial attention is given to the crops and methods of cultivation adapted to Virginia.

The single period is given to recitation, the double period to laboratory work. Experiments are conducted in the school garden as well as in the laboratory.

By constant use of the *Farmers' Bulletins* and other material sent out by the Agricultural College at Blacksburg and the District Agricultural Schools and by occasional addresses from the Farm Demonstrators and instructors from the above-named places, the students are brought into closer touch with the agricultural problems of the State and the best means of coping with them.

TEXT BOOK: To be selected.

AGRICULTURE (95 a, b)—Professional Year of Elementary Course. Two periods a week for Term A and three periods (one single and one double) a week for Term B. All of the work offered in Course 94 is embodied in this course, but on account of the fact that this course is given throughout the year, more work in practical Agriculture can be done. This course offers much better opportunity for studying the results of planting and special methods of cultivation than the shorter one.

TEXT BOOK: To be selected.

SPECIAL PHYSIOLOGY—This class is given in the spring term for those students who are unable to return to school, and who desire some Physiology as preparation for the State examinations. Special emphasis is laid upon those parts of the subject which will be of most value to teachers; for example, school hygiene, public sanitation, and first aid to the injured. A number of simple experiments are given to illustrate physiological principles. A small amount of laboratory work will be required, and class-room demonstrations will be made.

TEXT BOOKS: Ritchie's *Physiology*, Ritchie's *Primer of Sanitation*.

DEPARTMENT OF GEOGRAPHY.

DR. MILLIDGE.

Geography is one of the great culture studies of the common schools. Its special task is to carry the pupil out of the narrow bounds of his home, to dignify his life by making it part of the great life of mankind. Beginning with observation of the known, it cultivates the imagination by transferring the knowledge thus gained to the comprehension of the unknown. The moral effect upon the pupil in thus coming into harmony with the world in which he lives is not less valuable than the training of the faculties of observation, comparison, and judgment which this study, if properly taught, so richly supplies. The aim of the work in the Department of Geography is twofold:

First, to train the mind to the close and accurate observation of the world in which we live, to note the forces at work moulding its surface and fitting it to be the home of man, and to reason accurately upon the phenomena presented by observation, always tracing the relation between cause and effect.

Second, to broaden the mind by the fullest possible presentation of the races of mankind, their homes, industries, and habits. This knowledge leads to wider sympathies and broader views, and the process of tracing the dependence of all these upon geographical conditions is a mental discipline of the highest value.

The aim of the course in Nature Study is to lay especial stress upon its agricultural bearings. In this State it is important that the products and capabilities of the soil should receive especial attention. The school garden brings the students into close relation with Nature.

The adaptation of plants and animals to their environment is one of the main objects of Nature Study. The habit of close observation cultivated by the study of this adaptation leads directly to the intelligent practice of agriculture, upon which the welfare of the State so largely depends.

The keenness of observation, soundness of inference, and dependence upon one's own judgment, fostered by Nature Study, all tend directly to individuality of character, and this is the foundation of a sound democracy.

Commercial Geography treats of the conditions of interdependence among the civilized nations of the earth. It studies industrial progress, and the influence on this progress exercised by climate, topography, social conditions, manufacturing and transportation facilities and of financial conditions. The United States is studied in detail.

Industrial History treats of the labors and success of the American people in the prosecution and organization of every branch of industry and the social and political problems arising therefrom. The work of our inventors is emphasized. The business reasons are shown for the separation from England and for the opposition of North and South. Tariff questions, trusts and great corporations are also studied.

The work of this department, by courses, is as follows:

PHYSICAL GEOGRAPHY (100 a, b)—First Year. Two periods a week throughout the year. In the first term there is a comprehensive course, covering the requirements of the State examination for first-grade certificate. The main principles of Physical Geography are discussed in class and illustrated by field work and experiments. Written reports are required from each student. In the second term, in addition to the above, lessons are given in chalk modeling with instruction in methods.

TEXT BOOK: Hopkins' *Elements of Physical Geography*.

COMMERCIAL GEOGRAPHY AND INDUSTRIAL HISTORY (101 a, b)—Third year. Elective. Three periods a week throughout the year. In the first term Commercial Geography is taken up, including a brief survey of ancient and mediæval trade routes, modern colonization, areas of production of great staples and of minerals, means of transportation, manufacturing areas, and similar topics.

The dependence of Commercial Geography upon physiographic conditions is emphasized. In the second term the Industrial History of the United States is taken up. This course is based on the work of the previous term in Commercial Geography.

TEXT BOOKS: Gannett and Houston's *Commercial Geography*, Bogart's *Economic History of United States*.

GEOLOGY (102 a)—Four-Year, elective. Three periods a week for term A. Emphasis is laid on those sections of geology which specially illustrate geography, such as dynamical and structural geology. Field work is used to supplement and illustrate the text book.

TEXT BOOK: Norton's *Elements of Geology*.

ASTRONOMY (103 b)—Fourth Year, elective. Three periods a week for term B. Mainly a descriptive course on the elements of astronomy. The telescope is used to make observations.

TEXT BOOK: Young's *Lessons in Astronomy*.

GEOGRAPHY AND METHODS (104 a, b)—Junior Year of Courses I, II and III and Professional Year of Elementary Course. Three periods a week throughout the year. In the first term Mathematical and Physical Geography are taken up with experiments. Field work is emphasized, and the practical side of the subject dwelt upon rather than the theoretical. Interdependence of History and Geography illustrated. In the second term the work of the first term is continued and methods of teaching geography taken up. Chalk modeling on blackboard with making of sand maps required.

TEXT BOOK: Hopkins' *Elements of Physical Geography*.

DEPARTMENT OF MANUAL ARTS.

MANUAL TRAINING { MR. MATTOON.
MISS CLOSSON.

DRAWING—MISS COULLING.

The aim of the Manual Arts department is to encourage a greater growth of individual power and resource, to stimulate thought, individuality and expression, to train the hand as the obedient servant of the brain. It is of vital importance that students learn responsibility, habits of order, exactness, and concentration upon the matter under consideration. It is only by doing things that we gain confidence in ourselves, and thereby make our school life not an imitation of life, but a part of life itself.

Manual Training and Drawing are correlated under the head of Manual Arts. Abundant opportunity is given in these courses for practical training in the Training School, where the subject is taught in all grades under the direction of a special supervisor. The methods employed are largely governed by the needs of the students, and follow, as far as possible, the methods in use in the best schools. Freedom for original work is given, and it is confidently expected that a greater degree of independence and self-reliance will be the direct result of these courses. At least one specimen of work from each certificate set is selected and retained as the property of the school for exhibit purposes.

MANUAL TRAINING.

MR. MATTOON, MISS CLOSSON.

MANUAL TRAINING (110 a, b)—Second Year. Group I. Two periods a week throughout the year. The first term includes Raffia: braiding, knotting and weaving, construction of mats, bags, simple baskets, etc. Basketry: reed and sewed baskets in design, using various stitches. Use of home materials. Paper work. In the second term a course in plain sewing is given, including the use of the stitches most commonly used

in hand sewing, garment mending, making of simple garments. Stencil designs applied to garments, curtains, pillow tops, etc. Some study is given to material and to economical cutting in using patterns. Students furnish their own materials.

MANUAL TRAINING (111 a, b)—Third year. Elective. Two periods a week throughout the year. The first term is devoted to Mechanical Drawing for the purpose of training in habits of accuracy in measurements and a knowledge of geometric constructions and relations; working drawings to scale and development of surfaces. The second term embraces work in Paper and Cardboard Construction; planning objects of use in cardboard. Design and decoration.

MANUAL TRAINING (112 a, b)—Fourth Year. Elective. Two periods a week throughout the year. In the first term Knife Work in wood is undertaken. Practical exercises in the control of the knife and material are given. Form design and decoration and chip carving are studied and original work is dwelt upon. In the second term a course in Bench Work in wood is given and a short course in Bent Iron or Leather work for the purpose of teaching some applied design. Some attention will be given to methods and the lesson plan with a view to teaching in the grades.

MANUAL TRAINING (113 a, b)—Junior Year of Course II and III and Kindergarten Course. Two periods a week throughout the year. The first term is similar to the first term of Course (110 a, b), but suited to the advanced standing of the students. The second term is similar to the second term of Course (111 a, b), but condensed and more advanced. Some attention is given to methods.

MANUAL TRAINING (114)—Senior Year of Course II. Two periods a week for one term. This term embraces Knife Work in wood, offered for the section of the class which selects Manual Training for the grammar grades instead of Primary Industrial work.

DRAWING.

MISS COULLING.

The purpose of the work in Drawing is to train the powers of observation, secure some degree of skill in expression, develop originality, and cultivate an appreciation of the beautiful.

DRAWING (120 a, b)—Second Year. Group I. Two periods a week throughout the year. Pictorial representation of grasses, flowers and fruits in pencil outline, and gray wash and color. Simple landscape composition from photographs in charcoal and in wash, in two or three values. Still-life composition of curvilinear forms singly and in groups of two in shaded outline, and suggested light and shade. Design, constructive and decorative, to be applied in the manual training class when possible. This includes straight-line designs on squared paper for borders, surfaces, book covers, cutting of bowls and vases, designs of articles to be made in wood and basketry. Lettering. Freehand perspective of curvilinear forms and rectilinear forms in parallel perspective, study of color and design. Throughout the course the principles of balance, rhythm, and harmony are emphasized in working out all problems.

TEXT BOOK: Prang's *Art Education for High Schools*.

DRAWING (121 a, b)—Third Year. Elective. Two periods a week throughout the year. Flower composition. Landscape composition from photographs and nature details, accents, color, copying for technique. Study of color harmonies and their application in design. Stencil and wood block designs made. Pottery decoration. Mechanical perspective and free-hand applications in drawings in outline and light and shade, using geometric solids and still-life forms. Original designs made from plant, insect, and abstract spot motifs.

DRAWING (122 a, b)—Fourth Year. Elective. Two periods a week throughout the year. Still-life compositions in full

light and shade and charcoal and color. Pose drawing. Students pose as models. History of art. Study of the chief characteristics of leading styles of ornament, drawing of historic motifs and original designs based on these as time allows. The course is illustrated as fully as possible.

DRAWING (123 a)—Junior Year of Course I. Two periods a week for term A. This is a course in methods of teaching drawing in the grades. The course is based on that given in the Training School. Students examine different courses used in our State schools in order to recognize their relative values. Courses of study are made to fit possible conditions. Lessons are given in the theory and practice of teaching drawing.

REFERENCE TEXT BOOKS: Prang's *Progressive Lessons in Art Education* and Seegmiller's *Applied Arts Drawing Books*.

DRAWING (124 a, b)—Junior Year of Course II, and of Kindergarten Course. Two periods a week throughout the year. There is begun in this class a three-term course for high school graduates who have had no drawing. The course is based on Seegmiller's *Applied Arts Drawing Books*, chiefly books five, six and seven, with supplementary lessons on the principles of design, color, harmony and perspective.

DRAWING (125)—Senior Year of Course II and of Kindergarten Course. Two periods a week for one term. This course is similar to Course 123 a, but more elementary. It has more practice work in it and less methods.

DRAWING (126 a, b)—Junior Year of Course III and of the Kindergarten Course. Two periods a week throughout the year. The first term of this course is the same as in first term of course (124 a, b). In the second term the course is closely correlated with the class in Industrial Occupations (169) and with the Kindergarten hand-work.

DRAWING (127 a)—Senior Year of Course III and the Kindergarten Course. Two periods a week for one term. This course is a continuation of Course (126 a, b).

DEPARTMENT OF HOUSEHOLD ARTS.

*MISS CLOSSON.

The aim of the Household Arts Course is first, education; that education which is a development of power over self and over environment, enabling the student to live the best life possible for herself and to be of the most service to others. It is believed that this study will give an abiding interest in the most fundamental of all the industries of human life, home-making and the getting and preparing of food and clothing; that it will enable the student to see in one thing done rightly the likeness of all things done rightly; that habits of accuracy, neatness, correct judgment, and inventiveness will be established.

In the second place, the aim is to impart knowledge that will be of practical value. Our welfare as individuals and as a nation depends upon our home life; the making of this home life is entirely in the hands of woman. Every woman has something to do with the business of housekeeping in some way, at some time; even if she should not, "the mission of the ideal woman is to make the whole world homelike." Therefore every woman should have an understanding of the principles underlying this industry. She should know how to make a home healthful and attractive and how to keep it so; how to supply such food as will maintain the body in as nearly a state of perfect health as possible.

A third aim is to prepare students for the teaching of this subject in the schools of the State. As a result of this teaching we may look forward to a better quality of education and to the day when every child in the land will have wholesome, properly cooked food, and—"will be guided by intelligent hands over the threshold of that earthly paradise, a clean, restful, beautiful home."

The work of this department, by courses, is as follows:

HOUSEHOLD ARTS (130 a, b)—First Year. Group I. Five periods a week throughout the year.

*Acting teacher.

Cooking. One double period of practical work and one recitation period a week. In the first term the work includes the cooking of the simpler forms of food classes, and the furnishing and care of the kitchen. In the second term the cooking processes are continued, and the planning, cooking, and serving of simple meals, and marketing added.

Sewing. One double period a week. In the first term the common stitches and their uses are taught and the making of simple garments requiring the use of patterns. In the second term the drafting of patterns is taken up, and simple garments made from these patterns. Crocheting and knitting are added.

DOMESTIC SCIENCE (131 a, b)—Fourth Year. Elective. Two double periods a week throughout the year. The work of the first term covers the cooking of the simpler forms of food classes. In the second term the classification of foods is taken up, and meals are planned, prepared, and served.

NOTE: A fee of one dollar is charged in cooking classes. Students furnish their own material in sewing classes.

DEPARTMENT OF PHYSICAL TRAINING

MISS OVERALL.

"Health is Wealth."—Emerson.

All hopeful educational effort presupposes a substantial physical basis. The women who are to teach in our public schools should, first of all, be themselves physically strong, and should be proficient in the exercises which have been found best adapted for school use in developing the bodily vigor and symmetry of the young. To serve these important ends the State Normal School maintains a gymnasium. The work is based upon principles of hygiene and education. It aims to maintain a general healthy state of the body; to train and strengthen the organs, especially the organs of circulation and respiration; to develop the muscular and nervous system; to form correct postures, and to train some of the psychological powers.

PHYSICAL TRAINING—Two periods a week throughout each year.

The regulation suit is required, which consists of blouse, divided skirt, and low-cut gymnasium shoes. These will be ordered by the Head of the Department. Cost of suit, \$5.00; shoes, \$1.50.

EDUCATIONAL GYMNASTICS (141)—Junior Year of Course I, and Senior Year of Courses II and III. Two periods a week for one term, devoted to theory, with practical applications. The aim of this course is to acquaint our future teachers with the principles underlying physical training; also to show how these principles are applied to practical work, to prepare the students to teach intelligently school gymnastics and to adapt their work to the varying conditions which may be met. The theory includes talks on the history of physical training, applied anatomy, physiology of exercise, gymnastic movements and positions, terminology, system of physical training, methods of teaching, common defects among school children, gymnastic

games and athletics. Each student will be required to make plans and teach a section of the class under the supervision of the director. This will be followed by class criticism.

SONGS, GAMES, AND FOLK DANCES (182 b)—Junior Year of Course III and of Kindergarten Course. Three periods a week for term B. This course is given by Miss Overall, Miss Perkins of the Department of Music, and Miss Smith of the Kindergarten.

Folk dances include those involving simple and glide polka steps suitable to primary grades.

A special study of songs used in connection with the Kindergarten and folk dances is made with reference to their interpretation through content as well as tonal representation.

Kindergarten games include the organization of simple activities, interests and experiences of the child into game form together with sense games, trade games, traditional games and games appropriate to different seasons of the year.

*LIBRARY METHODS.

MISS DUGGER.

The purpose of Courses (150 a), (151 a), (152 a), and (153 a), is to aid the students in the intelligent use of the school library.

The work of Course (154 b) is to train prospective teachers in the administration of a small school library while teaching. A part of this course includes the study of reference works. All students who have completed the work of the second and third years will be excused from this part of the work. The courses offered are:

LIBRARY METHODS (150 a)—First Year. Four periods a term required. This course covers: Rules and regulations concerning the use of the school library; circulation of books; general arrangement of books in the library; and dictionaries studied in regard to their use and the information to be found in an unabridged dictionary.

LIBRARY METHODS (151 a)—Second Year. Four periods a term required. In this course the card catalogue and how to use it is taken up, and encyclopædias and atlases are studied in the same manner that dictionaries were in Course 150 a.

LIBRARY METHODS (152 a)—Third Year. Four periods a term required. This course includes: Biographical reference works; magazines and periodical indexes; and special reference works; and a review of dictionaries and encyclopædias.

LIBRARY METHODS (153 a)—Junior Year. Four periods a term required of all Juniors who have had no previous work in Library Methods. Two periods taken from time scheduled for English and two periods extra.

This course covers: Rules and regulations concerning use of library, arrangement of books and use of the catalog, and contents of reference department.

LIBRARY METHODS (154 b)—Junior Year of Courses I and II and Professional Year of Elementary Course. Eighteen periods a term required. Time taken from that scheduled for Observation. The aim of this course is to train students in the administration of a school library while teaching, and is preparatory to the work in the Training School in the Senior Year.

*All of this work except course (154 b) is done in time scheduled for English. Course (154 b) is done in time scheduled for Observation.

DEPARTMENT OF EDUCATION.

DR. STONE, MR. MADDOX, MR. COYNER, MISS JONES, MISS FALLS, MISS DUNN.

KINDERGARTEN EDUCATION.

MISS MEREDITH SMITH.

NOTE: Each head of department whose subject is taught in Training School gives a course in the *teaching* of his subject. These courses will be found as parts of the statement of the work of each respective department.

The understanding of the process of education and skill in the art of teaching are the two main phases of the aim of professional work.

To understand the process of education, it is necessary to know how the mind grows or learns best. This feature of professional training is supplied by educational psychology and related subjects.

To understand what the teacher can do to facilitate the process of learning best it is necessary to know how to select, arrange and relate subject matter so that it will come to the child with the greatest degree of educative value. This feature is supplied by work in methods, both general and special.

Both the subject matter of our education and the teacher's attitude toward the learner are the result of a long, slow growth. To comprehend fully a growing thing it is necessary to study the history of its growth. Such study is provided for in the history of education.

In order to meet the rapidly changing conditions of the present time every teacher needs a broad view of education as a whole. She needs to know something of the factors which are chiefly instrumental in modifying educational theories and practices and to have a rational basis for the interpretation and adaptation of new ideas. The philosophy of education aims to meet this need.

Finally, in order to possess skill in the art of teaching, practice in that art is necessary. Teaching in the training school supplies this practice.

The courses offered in this department are as follows:

PRINCIPLES OF TEACHING (160 a)—Junior Year of Courses I, II and III, and of Kindergarten Course, and Professional Year of Elementary Course. Three periods a week for term A. This course aims to equip the student with the elementary principles of teaching. Teaching is regarded as a means of facilitating learning. The elementary facts of educational psychology are studied with special reference to their significance for teaching. Students illustrate these facts from their own past and present learning experience, and opportunity is given for each student to do some work in simple experimentation in the problems of learning. Pyle's *Outlines of Educational Psychology* and Thorndike's *Individuality* constitute the main basis of the term's work. During part of the term a beginning will be made on the question of study, using McMurry's *How to Study*, and *Teaching How to Study* as the basis. Emphasis will be placed on the *How to Study* part. This will be done with the main purpose of enabling each student to improve her ability to study. A secondary purpose will be that of preparing for a better understanding of the *Teaching How to Study* part, which will be used in the *Methods and Management* Course and the *Teaching Work* of the Senior Year.

OBSERVATION (161 b)—Junior Year of Courses I, II and III and of Kindergarten Course, and Professional Year of Elementary Course. Three periods a week for term B. This course is a direct continuation of term A work in *Principles of Teaching*. In this work the student advances one more step toward actual teaching, i. e., she sees and studies the principles as they are used to facilitate the learning process. The observation of illustrative lessons is the main basis for this work. These lessons are taught by heads of departments or by supervisor, and are so planned as to illustrate especially some particular principle of teaching. Thus the elementary facts of educational psychology are reviewed by using them to interpret the teaching observed.

It is essential that this course be taken before practice teaching.

EDUCATIONAL PSYCHOLOGY (162 b)—Junior Year of Courses I and III and of Kindergarten Course. Three periods

a week for term B. This course is designed to broaden and deepen the student's knowledge of educational psychology and to teach general psychology in so far as this lays the foundation for educational theory. Special attention is given to the brain and nervous system, and to the development from childhood to the adult stage of memory, imagination, habit formation, association, feeling and the emotions, interest and volition.

TEXT BOOK: Betts' *The Mind and Its Education*.

PRIMARY METHODS (163)—Miss Jones. Junior Year of Courses I, II and III and of Kindergarten Course, and Professional Year of Elementary Course. Three periods per week for one term. In recognition of the fact that primary work requires special training, a course in Primary Methods is required of all students taking professional work. This is a course in methods of teaching reading, spelling, language, nature study and arithmetic in primary grades. It will consist of observation of work with classes of children in the Training School; a comparison of different methods of teaching reading with the view of arriving at the best. Special attention being given to phonics as an aid in mastering the mechanics of reading, a discussion of the aims and values of story telling in primary grades, sources of stories and selection of materials, practice in adapting and telling stories; values of poetry for primary grades, standards of selection and methods of teaching; scope of subject matter of arithmetic for the first two grades, utilization of child's experiences in the topics selected, methods of presentation.

METHODS AND MANAGEMENT (164)—Senior Year of Courses I, II and III. Three periods a week for one term. This course is taken parallel with practice teaching; and it is a continuation and an enlargement of the Junior work in *Principles of Teaching, Psychology, Special Methods, and Observation*. Its aim is to enable student-teachers to study the problems of teaching from the standpoint of actual practice. Methods and Management are treated as two inseparable phases of teaching. Part of the work is based on Senior observation. An average of about two periods per week is taken from Senior observation for this purpose.

This course lays stress on the point of view that good teaching is that which enables the learner to reconstruct his experience; but at the same time it gives due attention to the *drill* phases of learning. Strayer's *Teaching Process* is the main text.

Special attention is given to teaching to study. McMurry's *How to Study and Teaching to Study* is used in this phase of the work; the *How to Study* part is reviewed from Junior work and the *Teaching to Study* part is studied and exemplified in training school teaching and observation.

PHILOSOPHY OF EDUCATION (165)—Senior Year of Courses I, II and III and of Kindergarten Course. Four periods a week for one term. This course covers the field formerly included under Philosophy of Education and Child Study, and is open only to students having completed the Junior Course in Principles of Teaching or Psychology, or the equivalent. It aims to set forth the fundamental principles of educational theory and practice as they are derived from physiology, sociology, biology, psychology and philosophy. Special emphasis is laid upon the logical principles which underlie the thinking process. To this end such topics as induction and deduction, concept and percept, development in the formation of judgments, factors of reasoning and kindred topics receive careful consideration, and exemplification is sought in the work of the Training School. The basic principles of education thus set forth provide the future teacher with a comprehensive grasp of the subject that enables her to test for herself the value of educational theories, and makes her their master rather than their servant.

The course will follow a syllabus now in preparation. The main book sources are: Miller's *The Psychology of Thinking*, King's *Social Aspects of Education*, *Riverside Educational Monographs*, *Cyclopedia of Education*.

HISTORY OF EDUCATION (166)—Senior Year of Courses I, II and III and Junior A of Kindergarten Course. Three periods a week for one term. Educational theory and practice can best be understood through a study of its history. Here we come face to face with results. A knowledge of the past is most valuable for the successful inauguration of present ideals.

This course attempts to set forth the causes that have made for success or failure in the great epochs of the past. Special emphasis is laid upon the educational doctrines that have lived, the aim always being to find the causes of such permanent values as each age or individual has transmitted to us.

MAIN TEXT BOOK: Monroe's Briefer Course.

MAIN BOOKS FOR SUPPLEMENTARY READING: Hoyt's *Studies in the History of Modern Education*. *Cyclopedia of Education*.

MORAL PHASES OF EDUCATION (167)—Senior Year of Courses I and II. Two periods per week for one term. This course aims to prepare prospective teachers to realize on the possibilities of moral growth in children. To this end it deals with the conditions of moral growth and the means of promoting it. The work will be based on the nature of mind and its learning as developed in Principles of Teaching, Psychology and Philosophy of Education. The main texts will be Sisson's *The Essentials of Character*, Dewey's *Moral Principles in Education* and Cabot's *Ethics for Children*. Sisson's book will be used as a basis for restating the nature of the self and the learning process with special reference to moral growth; Dewey's, to enable students to realize on the possibilities and means of moral growth within school work as such; and Cabot's, as a means of enabling students to learn how to use the sources of material for promoting moral growth, as special situations of need arise.

EDUCATION OF MAN* (168 b)—Junior and Senior Kindergarten. One period a week for term A. Herford's adaptation of Froebel's famous work is used as a text. This is supplemented by lectures and outside reading. The aim is to present and discuss the fundamental principles of Froebel's philosophy upon which his contribution to Kindergarten work rests.

THE INDUSTRIAL PHASES OF EDUCATION† (169)—Miss Falls. Senior Year of Courses I, II and III, and of Kinder-

*Beginning with 1910-11 this course will be given only in alternative years and will be taken by Juniors and Seniors together.

†In Course II the Industrial Phases of Education is elective with Manual Training. (See page 36.) Student teachers of Grades I to IV inclusive take the Industrial Phases of Education, and those above the Fourth Grade take the Manual Training.

garten Course. Two periods a week for one term. The aim of this course is to give an intelligent and inquiring attitude towards industrial work in the elementary school system, a tangible basis for selection of subject matter for primary grades, and methods of teaching it. The course will also aim to enable the students to acquire skill in and standards for doing the industrial work suited to primary grades. The following topics are considered: a general survey of industrial phases of present-day education; the relative place and educative value of this work in the lower grades; problems of subject matter in relation to environment, child interests, and other subjects of the curriculum; method with emphasis placed upon self-direction. Much of this work is accompanied by and based upon observation in the Training School. Students will do as much practical work as time permits.

SEMINAR (170)—Senior Year of Courses I and II, and of Kindergarten Course. One period a week for one term. It is the purpose of the seminar to enable the students to acquaint themselves with the best current literature upon the subject of education. Worthy articles in the leading educational magazines are one large source for study and discussion. The course will be as flexible as possible and open to the study of such educational problems as are chosen by the members.

PRACTICE TEACHING (171)—Senior Year of Courses I and II, and of Kindergarten Course. The ability to teach is the ultimate test of students in the professional department. Skill in teaching is regarded as one of the essential requisites of the Normal School graduate, and unless sufficient ability is attained to discipline a room properly, and to give suitable instruction in the subject matter, the student can not be graduated. The teaching is done in the Training School, under the special supervision and direction of the supervisors for the grades and the heads of departments. The effort is continually made to inspire the young teacher with the true professional spirit, and to equip her with such methods and help as to make her efficient in her work. One term of teaching is required of all students, and it is evident that this much actual experience in the school room gives the student teacher a power which could

not be gained by any amount of theoretical information, *per se*. Hence practice teaching is required in the Senior Year of all candidates for the professional certificate or the diploma.

SCHOOL MANAGEMENT (172 b)—Professional Year of Elementary Course. Two periods a week for term B. The aim of this course is to enable prospective teachers to handle the practical problems of class-room management successfully, both from the standpoint of discipline in the narrow sense and from the standpoint of promoting the development of the pupils. Special attention will be given to the need of graded rural schools.

SEMINAR (173 b)—Miss Dunn. Professional Year of Elementary Course. One period a week for term B. The purpose of this seminar is to acquaint the student with rural life and rural education. The work will be in the nature of elementary rural sociology with special reference to education. Particular attention will be given to present tendencies in the better rural schools of Virginia.

ELEMENTARY PEDAGOGY—This course is given in the spring term for those students who expect to teach without being able to complete the full work for graduation. The aim is to select for discussion those topics which will give the student some insight into the field of pedagogic thought and at the same time to prepare her to deal judiciously with the practical problems which every teacher meets in organizing and managing a school. Methods applicable to rural schools will receive special attention. The main text will be the one on which the State examination in school management is based.

CURRENT EDUCATIONAL PROBLEMS—For the benefit of all students who expect to teach the following year. This course is a series of lectures by representative educational leaders of the State and elsewhere. Special attention is given to the phases of educational administration and school law that affect the teacher as such. The main points of these lectures are taken up, discussed and further studied, in various other courses in education. Topics of general current educational interest such as Child Labor, Public Sanitation, Boys' and Girls' Industrial Clubs, will also be presented by specialists.

KINDERGARTEN EDUCATION.

MISS MEREDITH SMITH.

The aim of this department of Education is to give the student a thorough kindergarten training. This involves an insight into the fundamental educational principles which underlie the whole process of education. The work of the department is so unified with other work in education as to enable the student to see the development of the child as a continuous process of which the kindergarten represents the beginning phases.

The connection between the kindergarten and the primary grade is especially emphasized and the opportunity for observation and practice teaching in both departments makes it possible for the student to comprehend how the work done in one department may be carried over, utilized and extended in the next.

In addition to the kindergarten work this course includes other courses in the Department of Education, and also several related courses in other departments. (See page 37.)

The courses offered by the Kindergarten Department are as follows:

KINDERGARTEN GIFTS (180 a, b)—Junior Year of Kindergarten Course. Two periods a week throughout the year. This course is intended to give a mastery of Kindergarten Gifts and an insight into their use as a means of developing thought. The two methods of experimentation and presentation of the problem will be worked out in their application to this material. Presentation to the class of original gift plays is required of all students.

LITERATURE IN THE KINDERGARTEN AND PRIMARY GRADES (181 b)—Junior Year of Kindergarten Course and of Course III. Two periods a week for term B. In this course a study is made of literature appropriate for children, with discussion of the principles underlying the selection and presentation of stories to children. Myths, folk and fairy tales, fables, legends, history stories, nature stories, rhymes and poetry are consid-

ered. The course aims to present a broad range of material which will give a good basis for the appreciation and selection of stories suitable to children of different ages. Classification is worked out with regard to sources and stories adapted to various ages and purposes. Research work is expected from students taking this course. The opportunity for individual presentation of stories to children is provided for.

SONGS, GAMES AND FOLK DANCES (182 b)—Junior Year of Kindergarten Course and of Course III. Three periods a week for term B. This course is given by Miss Smith, Miss Overall of the Department of Physical Training, and Miss Perkins of the Music Department. The Kindergarten games include organization of simple activities, interests and experiences of the child into game forms. Sense games, trade games, traditional games and games appropriate to different seasons of the year are developed. Various rhymes suitable to Kindergarten and Primary Grades are given. Such subjects are discussed as the meaning of play, possible aims and problems connected with plays and games, the relationship between activity and mental development, and the value and need of sense training.

Folk dances involving simple glide and polka steps suitable to primary grades are given.

A special study of the songs used in connection with the kindergarten games and folk dances is given with reference to their interpretation through content as well as tonal representation.

KINDERGARTEN OCCUPATIONS (183 a)—Junior Year of Kindergarten Course. One period a week for term A. In this course kindergarten materials are considered with reference to the child's life and to his natural mode of expression.

INDUSTRIAL OCCUPATIONS (184 a)—Senior Year of Kindergarten Course and of Course III. Two periods a week for term A. The work of this course has grown out of an historical effort to meet the constructive instinct of the child in a way that would be nearer to his play life. The aim is to so direct these activities of the child that they will lead to results, on the level of the child's ability and interests, which

will be in harmony with the principles underlying the Fine Arts, and with the experimental method of science. Such topics are discussed as play, involving the distinction between work and play, between the toy and play materials, and the relation of art to industry.

The work of this course makes a definite application of work done in drawing (126 a, b) and (127 a).

KINDERGARTEN PRINCIPLES AND METHODS (185 a, b)—Senior Year of Kindergarten Course. Two periods a week throughout the year. This course makes a study of the educational principles and methods upon which the kindergarten program is based. An analytic study is made of the kindergarten materials, songs, games, stories, gifts and occupations, considering the place and function of each in the kindergarten program. Part of the course is devoted to an historical survey of the kindergarten movement, aiming to acquaint the student with the different forces that have operated in forming the kindergarten situation of to-day.

PROGRAM AND MOTHER PLAY (186 a, b)—Senior Year of Kindergarten Course. Two periods a week throughout the year. In this course a critical and comparative study is made of typical kindergarten programs resulting in the construction of a program, which will make practical application of the principles and methods presented in course (185 a, b).

Froebel's Mother Plays are studied as illustrations of the first great effort to give social meanings to the child through play, and also as illustrations of the most effective means of meeting the child's impulses and instincts that, up to Froebel's time, had been worked out. Application of the underlying principles is made to present conditions of child life.

CONFERENCE (187 a, b)—Senior Year of Kindergarten Course. One period a week throughout the year. In this conference the program, as it is to be carried out in the kindergarten, is discussed. The results of preceding lessons as these were developed in work with the children are reviewed, and deductions made which will be serviceable for future guidance.

TRAINING SCHOOL DEPARTMENT

*FACULTY.

JOSEPH L. JARMAN.....	<i>President</i>
CLIFF W. STONE.....	<i>Director</i>
W. ARTHUR MADDOX.....	<i>Principal</i>
W. ARTHUR MALDOX.....	<i>Supervisor of Seventh and Eighth Grades</i>
MARY D. PIERCE.....	<i>Supervisor of Fifth and Sixth Grades</i>
ELEANOR B. FORMAN.....	<i>Supervisor of Third and Fourth Grades</i>
M. ELIZABETH FALLS.....	<i>Supervisor of Second Grade</i>
MARY PHILIPPA JONES.....	<i>Supervisor of First Grade</i>
MEREDITH SMITH.....	<i>Supervisor of Kindergarten</i>
MARY E. PECK.....	<i>Assistant Supervisor of Seventh Grade</i>
MAMIE E. ROHR.....	<i>Assistant Supervisor of Sixth Grade</i>
MAUDE I. TILLMAN.....	<i>Assistant Supervisor of Third Grade</i>

†ORGANIZATION.

The Training School, which consists of a Kindergarten and eight grades, is in charge of a Director, the Principal of the Training School, Heads of Departments, Supervisors, and Grade Teachers. As student-teachers certain responsibilities are delegated to members of the Senior Class. The Director is also Head of the Department of Education, hence the work of the Training School is in close touch with the best educational thought. The purpose of this school is to give to the student-teachers actual experience in solving the various problems which confront the teacher. They are placed in charge of part or all of a room, and as soon as practicable are held responsible for the discipline as well as the teaching. All practice teachers are carefully supervised.

*Heads of Departments, whose subjects are represented in the Training School, are also members of the Training School Faculty.

†Detailed phases of organization are covered in the "Report of the Committee on Relationship in the Training School."

At the beginning of the Senior Year the Director of the Training School divides the Senior Class into two sections. The members of one section finish up their class work, while the members of the other devote almost their entire time to teaching. In the spring term the sections reverse. This division is made in order that the students who are teaching in the Training School may be practically free for this work.

No student is allowed to graduate, however proficient she may be in the academic branches, until she has satisfied the Training School Faculty that she is qualified to teach.

JUVENILE LIBRARY.

For the use of the Training School there is a collection of 522 juvenile books and half a dozen magazines. From these each grade draws a supply for reading with the children, thereby forming a small class-room library. A student-teacher in each room is in charge of the books selected by her grade and is held responsible to the Library for them. Collections are changed in part or as a whole as the need arises. A student-teacher must have completed the Library Methods Course in the Junior Year to be allowed to have charge of this grade library.

EXPENSES.

A fee of \$5.00, payable \$2.50 a term in advance, is charged every pupil entering the Training School. In the first and second grades this fee provides pupils with all material except text books. In the intermediate and grammar grades the following material is supplied: drawing paper, colored crayons, water colors, rulers, dividers, drawing pencils, pen points, ink, theme paper, and pictures for work in language and history.

THE COURSE OF STUDY.

Special attention is given to the Training School Course of Study. The aim is to make it more than a mere listing of the subject matter adapted to each particular grade. In addition to this arrangement of subject matter the course of study attempts to show the relation of formal subject matter to the life interests of the learners.

The course of study is being printed as a separate bulletin.
